[FHA Instruction 411.1]

PART 316-APPLICANTS

CRITERIA FOR SELECTION

Section 316.2 (o) Title 6, Code of Federal Regulations (13 F. R. 9393), is revised to define contractual authority of individuals in language which is more adaptable to jurisdictions where the age of majority is less than 21 years, and to eliminate the requirement that the applicant's wife must have reached the age of majority. The paragraph as revised reads as follows:

§ 316.2 Requirements. * * *

(o) Not be under legal disability of minority.

(Sec. 41 (1), 60 Stat. 1066; 7 U.S. C. 1015 (1). Interprets or applies sec. 44 (b), 60 Stat. 1069; 7 U.S. C. 1018 (b))

July 1, 1953.

[SEAL]

R. B. McLeaish, Administrator

Farmers Home Administration.

Approved: July 10, 1953.

J. EARL COKE.

Acting Secretary of Agriculture.

Chapter IV—Production and Marketing Administration and Commodity Credit Corporation, Department of Agriculture

Subchapter C-Loans, Purchases, and Other Operations

[1953 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Wheat]

> PART 601-GRAINS AND RELATED COMMODITIES

SUBPART-1953-CROP WHEAT LOAN AND PURCHASE AGREEMENT PROGRAM

SUPPORT RATES

The 1953 C. C. C. Grain Price Support Bulletin 1, as amended, 18 F. R. 1900 and 3705, issued by the Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1953 was supplemented by 1953 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Wheat, as amended, 18 F. R. 2733, and containing specific requirements applicable to price support operations on the 1953 wheat crop. These regulations are further supplemented as follows:

§ 601.111 Support rates. Loans will be made, and wheat delivered under purchase agreements will be purchased at the support rates set forth in this section.

(a) Basic support rates at designated terminal markets. Basic support rates per bushel for No. 1 dark hard winter, No. 1 hard winter, No. 1 yellow hard winter, No. 1 red winter, No. 1 western red, No. 1 soft white, No. 1 white club, No. 1 western white, No. 1 hard white, No. 1 heavy dark northern spring, No. 1 heavy northern spring, No. 1 heavy red spring, No. 1 hard amber durum, No. 1 amber durum, and No. 1 durum, stored in approved warehouses at the terminal markets listed below are as follows:

such owner, occupant, or user of the land.

- (b) A similar agreement to that required in paragraph (a) of this section shall be executed by the tribe or legally authorized occupant or user of tribal land and the applicant before any work by the applicant may be undertaken on the land for the construction of a service line across such tribal land. Such a service line shall be for the sole purpose of supplying such occupant or user of such tribal land with any of the services dealt with in paragraph (a) of this section. No agreement under this paragraph shall be valid unless its execution shall have been duly authorized in advance of construction by the governing body of the Indian tribe whose land is affected.
- (c) An agreement covering service lines shall include thereon, or have appended thereto, a plat or diagram showing with particularity the location, size, and extent of the line. When the plat or diagram is placed on a separate sheet it shall bear the signatures of the parties. In case of tribal land, the agreement shall be accompanied by a certified copy of the tribal authorization.
- (d) An executed copy of the agreement, together with a plat or diagram, and in the case of tribal land, an authenticated copy of the tribal authorization shall be filed with the superintendent of the reservation on which the service line is to be built within 30 days after the date of its execution. Failure to meet this requirement may result in the removal of any such improvements placed on the land at the expense of the party responsible for the placing of such improvements thereon and subject such party to the payment of damages caused by his unauthorized act.
- 2. There is added to § 256.27 a new paragraph (f)

§ 256.27 Power projects. * * *

(f) Applicants, in lieu of furnishing maps based on surveys, including field notes, as required by §§ 256.8 to 256.13, inclusive, may obtain rights of way for distribution lines of less than 33 kv and telephone lines by filing two linen tracings and four print copies of a drawing showing the size and the location of the line in relation to the boundaries of each tract of land involved. The drawings shall show thereon whether the land to be crossed by the right of way is tribal or allotted. If allotted land, there shall appear on the drawing in addition to the section, township, and range number the name of each allottee and the respective allotment number. Each drawing shall contain a certificate executed by the engineer or the person who prepared the drawing, and the president, or other proper official of the applicant, certifying that the line is located as shown on the

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Office of International Trade [6th General Rev. of Export Regs., Amdt. P. L. 472]

PART 399—POSITIVE LIST OF COLLIDOITIES AND RELATED MATTERS
MISCELLANEOUS AMERICALISTS

Section 399.1 Appendix A—Positive List of Commodities is amended in the following particulars:

1. The following commodities are added to the Positive List:

Dept. of Com- mercs • Echedule B No.	Commedity	Unit	Proceeding code and related commodity group	GLV dollar- value limits	Vali- dated license required
700305	Scaled beam headlamps sultable for mounting on auto- motive vehicles.	No.	TRAN 6	160	R
	Crude coal-tar products, unmixed, n.e.s., except coal-tar acids (specify by name):				

This part of the amendment shall become effective as of 12:01 a. m., July 9, 1953.

2. The following commodities are deleted from the Positive List:

COTA

200

 $\mathbf{R}\mathbf{0}$

Lb.

Dept. of Com- merco Schedulo B No.	Commodity
692900	Feathers, dressed, and manufactures of feathers except waste: Used down and waterfowl feathers, 3 inches in length and under; and the following manufactures of down and waterfowl feathers, 3 inches in length and under; down comforters, down-filled coats and lackets, feather pillows, elsepting hays, and elsepting robes.)
494000	Battery beard: electrical inculation board, except wet machine.
484400	Wet machine board, electrical insulation only. Converted paper and board products: Wrapping paper products:
486400	Laminated waterproof paper, wire-wrapping only. Asbestos:
545150	Unmanufactured: Waste and refuse.
982501	Paint brushes, all types, using bog brictles in lengths longer than 27% inches.

¹ By this amendment, the entry presently on the Positive List under Schedule B No. 032300 is revised to read as follows: "Down, and waterfowl feathers, 3 inches in length and under, new, dressed (not including manufactures)."

This part of the amendment shall become effective as of 12:01 a. m., July 2, 1953.

3. The following revisions are made in commodity descriptions:

Dept. of Com- merce Schedule B No.	Commodity	Voit	Processing code and related commedity group	GLV dollar- value limits	Vall- dated license required
619159★ 630070★	Aluminum metal and alloys in crude form (including ingots, pigs, blooms, and clabs).3	Lb. Lb.	NONF NONF	Nопе 160	RO RO

the Positive List under Schedule caps to the commodities excepted

Whe above entry is substituted for the entry presently on the Positive List under Schedule from this entry above entry is substituted for the first entry presently on the Positive List under Schedule B. Or Jails. The effect of this revision is to clarify the description; and to change the processing code from CONS to CONS 8.

The processing code from CONS to CONS 8.

The processing code from CONS to CONS 8.

The processing code from the Fositive List under Schedule B. No. 812100. It is presently included in the last entry under that Schedule B. number. The effect of this revision is to reduce the GLV dollar value limits from \$25 it to none; to extend the controls from R to RO; and to change the processing code from DRUG 4 to DRUG.

The above entry is substituted for the thirty third entry presently on the Positive List under Schedule B. No. 839900. The effect of this revision is to require applicants to specify the schedule B. No. 839900. The effect of this revision is to require applicants to specify the schedule.

selection B. Were strong to The effect of this weeking is to change the GPV collecture Lists under 187, 200 and the presenting collecture of the CNOS is COOK 200.

TITLE 7—AGRICULTURE

§ 728 403 Basis and purpose. (a) The regulations contained in §§ 728 403 and 728 404 are issued to proclaim the amount of the national acreage allot-ment for wheat for the 1954 crop Sec-tion 332 of the Agricultural Adjustment Act of 1938, as amended requires the Secretary of Agriculture, not later than July 15 of each marketing year to ascertain and proclaim the national acreg 8 crop the next 성 Section 333 age allotment for wheat. Section 33

by the Secretary contained in § 728.404
have been made on the basis of the latest
available statistics of the Federal Government and after due consideration of
data views and recommendations reteived from wheat producers and others
as provided in the notice (18 F R. 2417)
is given in accordance with the Administrative Procedure Act 6 U S. C 1003)
(C) Since the Agricultural Adjustf ment Act of 1938, as amended, and as
supplemented by P L. 117 83d Congress acres

requires the holding not later than August 15, 1953, of a referendum of wheat producers who will be subject to the national marketing quota proclaimed on the 1954 crop (18 F. R. 3780) to determine whether such producers favor such marketing quota and requires, insofar as practicable, the mailing of notices of farm acreage allotments to farm operators prior to the date of the referendum, and since farm acreage allotments cannot be established until the national acreage allotment has been determined and apportioned among States and counties, it is hereby found that compliance with the 30-day effective date provision of the Administrative Procedure Act is impracticable and contrary to the public interest. Therefore, the proclamation contained herein shall become effective upon filing with the Director, Division of the Federal Register.

§ 728.404 1954 national acreage allotment for wheat. The estimated carry-over of wheat for the marketing year beginning July 1, 1954, is 760 million bushels. A normal year's domestic consumption and exports of wheat are 1,050 million bushels. Imports of wheat during the marketing year beginning July 1, 1954, are estimated to be negligible. The national average yield of wheat is 15.0 bushels per acre. The national acreage allotment computed for the 1954 crop of wheat is 40,333,333 acres. Since this amount is less than the minum provided for by law, the national acreage allotment for the 1954 crop of wheat shall be 62 million acres.

Issued at Washington, D. C., this 15th day of July 1953.

[SEAL] J. EARL COKE,
Acting Secretary of Agriculture.

Chapter VIII—Production and Marketing Administration (Sugar Branch), Department of Agriculture

Subchapter H—Determination of Wage Rates
[Sugar Determination 863.6]

PART 863-SUGARCANE: FLORIDA

FAIR AND REASONABLE WAGE RATES FROM JULY 1, 1953 THROUGH JUNE 30, 1954

Pursuant to the provisions of section 301 (c) (1) of the Sugar Act of 1948, as amended (herein referred to as "act") after investigation, and consideration of the evidence obtained at the public hearing held in Clewiston, Florida on May 6, 1953, the following determination is hereby issued:

§ 863.6 Fair and reasonable wage rates for persons employed in the production, cultivation, or harvesting of sugarcane in Florida during the period July 1, 1953, through June 30, 1954—(a) Requirements. The requirements of section 301 (c) (1) of the act shall be deemed to have been met with respect to the production, cultivation, or harvesting of sugarcane in Florida during the period July 1, 1953 through June

30, 1954, if the producer complies with the following:

(1) Wage rates. All persons employed on the farm in the production, cultivation, or harvesting of sugarcane shall have been paid in full for all such work and shall have been paid wages in cash therefor at rates as agreed upon between the producer and the worker, but after July 1, 1953, or the date of issuance of this determination, whichever is later, not less than the following:

(i) For work performed on a time

Cents per hour

(a) Adult tractor drivers and operators of mechanical harvesting or loading equipment.....

(ii) For work performed on a piece-work basis. The piecework rate for any operation shall be as agreed upon between the producer and the worker: Provided, That the hourly rate of earnings of each worker employed on piecework during each pay period (such pay period not to be in excess of two weeks) shall average for the time involved not less than the applicable hourly rates prescribed in subdivision (i) of this subparagraph.

(2) Compensable working time. For work performed under subparagraph (1) of this paragraph, compensable working time includes all time which the worker spends in the performance of his duties except time taken out for meals during the work day. Compensable working time commences at the time the worker is required to start work. If the worker 1s required by the producer to report to a place other than the field, such as an assembly point, stable, tractor shed, etc., time spent in transit to the field is compensable working time. Any time spent in performing work directly related to the principal work performed by the worker such as servicing equipment, is compensable working time. Time of the worker while being transported from a central recruiting point or labor camp to the farm is not compensable working time. Compensable working time ends upon completion of work in the field except for the operator of mechanical equipment, the driver of animals or any other class of worker who is required by the producer to return to a designated place on the farm. In such cases, time spent in transit to such point is compensable working time.

(3) Equipment necessary to perform work assignment. The producer shall furnish without cost to the worker any equipment required in the performance of any work assignment. However, a charge may be made for equipment furnished any worker for the cost of such equipment in the event of its loss or destruction through negligence of the worker. Equipment includes, but is not limited to, hand and mechanical tools

and special wearing apparel, such as boots and raincoats, required to discharge the work assignment.

(4) Perquisites. In addition to the foregoing, the producer shall furnish to the worker, without charge, the perquisites customarily furnished by him such as a habitable house, garden plot, medical attention, and similar items.

(b) Subterfuge. The producer shall not reduce the wage rates to workers below those determined in this section through any subterfuge or device whatsoever.

(c) Claim for unpaid wages. Any person who believes he has not been paid in accordance with this determination may file a wage claim with the local County Production and Marketing Administration Committee against the producer on whose farm the work was performed. Such claim must be filed within two years from the date the work with respect to which the claim is made was performed. Detailed instructions and wage claim forms are available at the office of the local County PMA Committee. Upon receipt of a wage claim the County PMA Committee shall thereupon notify the producer against whom the claim is made concerning the representation made by the worker, and, after making such investigation at it deems necessary, notify the producer and worker in writing of its recommendation for settlement of the claim. If either party is not satisfied with the recommended settlement, an appeal may be made to the State PMA Committee, Cheops Buildings, Gainesville, Florida. which shall likewise consider the facts and notify the producer and worker in writing of its recommendation for settlement of the claim. If the recommendation of the State PMA Committee is not acceptable, either party may file an appeal wih the Director of the Sugar Branch, Production and Marketing Administration, U.S. Department of Agriculture, Washington 25, D. C. All such appeals shall be filed within 15 days after receipt of the recommended settlement from the respective committee, otherwise such recommended settlements will be applied in making payments under the act. If a claim is appealed to the Director of the Sugar Branch, his decision shall be binding on all parties insofar as payments under the act are concerned.

STATEMENT OF BASES AND CONSIDERATIONS

(a) General. The foregoing determination provides fair and reasonable wage rates which a producer must pay, as a minimum, for work performed by persons employed on the farm in the production, cultivation, or harvesting of sugarcane in Florida during the period from July 1, 1953 through June 30, 1954, as one of the conditions for payment under the act.

(b) Requirements of the act and standards employed. In determining fair and reasonable wage rates it is required under the act that a public hearing be held, that investigations be made and that consideration be given to (1) the standards formerly established by the Secretary under the Agricultural Adjustment Act, as amended, and (2)

No. 138---3

the differences in conditions among various sugar producing areas.

A public hearing was held in Clewiston. Florida, on May 6, 1953, at which interested persons presented testimony with respect to fair and reasonable wage rates for sugarcane work during the period from July 1, 1953 through June 30, 1954. In addition, investigations have been made of conditions affecting such wage rates. In this determination consideration has been given to the testimony presented at the hearing and to information resulting from investigations. The primary factors which have been considered are (1) cost of living; (2) prices of sugar and by-products; (3) income from sugarcane; and (4) costs of production. Other economic influences also have been considered.

(c) 1953-54 wage determination. The 1953-54 wage determination differs from the preceding determination in four respects: (1) Wage rates for adult workersare increased five cents per hour. (2) wage rates for workers between 14 and 16 years of age are changed from a specific rate per hour to a rate not less than three-fourths of the respective adult rates; (3) compensable working time is specified: and (4) specifications are established concerning the furnishing to workers of equipment necessary to perform work assignments.

At the public hearing, producer representatives recommended that there be no increases in the 1953-54 wage determination. Several producers also recommended that specifications with respect to compensable working time and requirements as to furnishing equipment necessary to work assignments should not be made a part of the wage determination. A labor union representative recommended a 75 cents per hour minimum wage attributing the unavailability of domestic farm workers to the current wage levels.

Testimony of the several producer witnesses included statements that the majority of workers continue to be imported from the British West Indies; that the preponderance of hand labor work is performed on the piecework or task basis; that the average earnings of piecework or task employees for harvesting sugarcane range from 25 to 50 cents per hour higher than the determination hourly rate; and that resident domestic workers perform most of the semi-skilled or skilled operations at hourly rates which, on the majority of farms, range from 5 to 80 cents per hour above the determination minimum for 1952-53.

In this determination consideration has been given to the testimony and recommendations presented at the public hearing, to the standards customarily considered in wage determinations, and to the returns, costs and profits of sugarcane producers. The latter data were obtained by restating survey information for prior years in terms of production and crop conditions and prices for sugar and molasses expected to prevail for the 1953-54 crop. During recent years the economic position of producers has improved as a result of favorable weather, higher yields of sugar and sugarcane, more efficient production methods, and

firm sugar prices. Concurrently, there has been a sustained increase in labor productivity on the farm. The wage rate adjustments of this determination reflect the continuing trend in productivity and the more favorable situation of sugarcane producers. The new rates will offset increases in living costs to workers during recent years and provide some improvement in living standards.

The inclusion in the wage determination of specifications regarding compensable working time and the furnishing of equipment necessary to the performance of work assignments is deemed necessary so that the producers and workers may have full knowledge of the minimum standards with respect to these items. The new provisions will not appreciably alter present practices as most producers follow the minimum requirements specified.

The provision for a proportionate rate for workers 14 to 16 years of age will permit variable rates of pay to such workers in accordance with the adult job classification rather than a single rate fixed solely by age group.

After consideration of all factors, the wage rates and other provisions in this determination are deemed to be fair and reasonable.

Accordingly, I hereby find and con-clude that the foregoing wage determination will effectuate the wage provisions of the Sugar Act, as amended.

(Sec. 403, 61 Stat. 932; 7 U. S. C. Sup., 1153. Interprets or applies sec. 301, 61 Stat. 929; 7 U. S. C. Sup., 1131)

Issued this 10th day of July 1953.

J. EARL COKE. [SEAL] Acting Secretary of Agriculture.

TITLE 26—INTERNAL REVENUE

Chapter I-Internal Revenue Service, Department of the Treasury

Subchapter A-Income and Excess Profits Taxes [T. D. 6030]

PART 7-TAXATION PURSUANT TO TREATIES

SUBPART-FINLAND

7.700 Introductory.

7.701 Dividend 7.702 Interest. Dividends.

7.703 Copyright royalties.

Natural resource royalties and real property rentals.

Pensions and life annuities. 7.705

Release of excess tax withheld at 7.706 source.

Addressee not actual owner. 7,707

Information to be furnished in 7.708 ordinary course.

Beneficiaries of a domestic estate or 7.709 trust.

Refund of excess tax withheld during 1952.

AUTHORITY: §§ 7.700 to 7.710 issued under 53 Stat. 32, 467; 26 U. S. C. 62, 3791.

§ 7.700 Introductory. (a) The income tax convention between the United States and Finland, signed March 3, 1952, proclaimed by the President of the United States on December 22, 1952, and effective for taxable years beginning on

or after January 1, 1952, referred to in this suppart as the convention, provides in part as follows:

ARTICLE I

(1) The taxes referred to in this Convention are:

(a) In the case of the United States of America: The Federal income tax, including surtaxes and excess profits taxes.

(b) In the case of Finland: The State (National) income tax.

(2) The present Convention shall also apply to any other taxes of a substantially similar character imposed by either contracting State subsequently to the date of signature of the present Convention.

ARTICLE II

(1) As used in this Convention:

(a) The term "United States" means the United States of America, and when used in a geographical sense includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(b) The term "Finland" means the Republic of Finland.

(c) The term "permanent establishment" means a branch office, factory, warehouse or other fixed place of business, but does not include the casual and temporary use of merely storage facilities, nor does it include an agency unless the agent has and exercises a general authority to negotiate and conclude contracts on behalf of an enterprise or has a stock of merchandise from which he regu-larly fills orders on its behalf. An enterprise of one of the contracting States shall not be deemed to have a permanent establishment in the other State merely because it carries on business dealings in such other State through a bona fide commission agent, broker or custodian acting in the ordinary course of his business as such. The fact that an enterprise of one of the contracting States maintains in the other State a fixed place of business exclusively for the purchase of goods or merchandise shall not of itself constitute such fixed place of business a permanent establishment of such enterprise. that a corporation of one contracting State has a subsidiary corporation which is a corporation of the other State or which is engaged in trade or business in the other State shall not of itself constitute that subsidiary corporation a permanent establishment of its parent corporation.

(d) The term "enterprise" includes every form of undertaking whether carried on by an individual, partnership, corporation, or

any other entity.
(e) The term "enterprise of one of the contracting States" means, as the case may be, "United States enterprise" or "Finnish enterprise"

(f) The term "United States enterprise" means an enterprise carried on in the United States by a resident or partnership of the United States or by a United States corporation or other entity; the term "United States corporation or other entity" means a corporation or other entity created or organized in the United States or under the law of the United States or of any State or Territory of the United States.

(g) The term "Finnish enterprise" means an enterprise carried on in Finland by a resident or partnership of Finland or by a Finnish corporation or other entity; the term "Finnish corporation or other entity" means a corporation or other entity created or organized in Finland or under Finnish law.

(h) The term "competent authorities" means, in the case of the United States the Commissioner of Internal Revenue as authorized by the Secretary of the Treasury; and in the case of Finland, the Taxation Department of the Ministry of Finance.

(2) In the application of the provisions of the present Convention by one of the contracting States any term not otherwise defined shall, unless the context otherwise requires, have the meaning which such term has under the tax laws of that State.

ARTICLE VI

- (1) The rate of United States tax on dividends derived from a United States corporation by a resident or corporation or other entity of Finland, not engaged in trade or business in the United States through a permanent establishment therein, shall not exceed 15 percent: provided that such rate of tax shall not exceed 5 percent if such Finnish corporation controls, directly or indirectly, at least 95 percent of the entire voting power in the corporation paying the dividend, and not more than 25 percent of the gross income of such paying corporation is derived from interest and dividends, other than Interest and dividends from its own subsidiary corporation. Such reduction of the rate to 5 percent shall not apply if the relationship of the two corporations has been arranged or is maintained primarily with the intention of securing such reduced rate.
- (2) The rate of Finnish tax on dividends derived from a Finnish corporation by a resident or corporation or other entity of the United States, not engaged in trade or business in Finland through a permanent establishment therein, shall not exceed 15 per-cent: provided that such rate of tax shall not exceed 5 percent if such United States corporation controls, directly or indirectly, at least 95 percent of the entire voting power in the corporation paying the dividend, and not more than 25 percent of the gross income of such paying corporation is derived from interest and dividends, other than interest and dividends from its own subsidiary corporation. Such reduction of the rate to 5 percent shall not apply if the relationship of the two corporations has been arranged or is maintained primarily with the intention of secur-ing such reduced rate. For the purposes of this paragraph the combined Finnish tax on such dividends and the Finnish property tax on the capital stock of a Finnish corporation owned by such resident or corporation of other entity shall not exceed an amount computed at such rates as applied to dividends, if any, so derived.

ARTICLE VII

(1) Interest on bonds, securities, notes, debentures, or on any other form of indebtedness derived from sources within one of the contracting States by a resident or corporation or other entity of the other contracting State, not having a permanent establishment in the former State; shall be exempt from tax by such former State.

(2) Bonds, bank deposits and trade balances beneficially owned by a resident or corporation or other entity of the United States shall be exempt from the Finnish property tax.

ARTICLE VIII

Royalties for the right to use copyrights or in respect of the right to produce or reproduce any literary, dramatic, musical, or artistic work (but not inclusive of rents or royalties in respect of motion picture films) derived from sources within one of the contracting States by a resident or corporation or other entity of the other contracting State, not engaged in trade or business in the former State through a permanent establishment therein, shall be exempt from tax imposed by such former State.

ARTICLE IX

(1) Income from real property (not including interest derived from mortgages and bonds secured by real property) and royalties in respect of the operation of mines, quarries, or other natural resources, shall be taxable only in the contracting State in which such property, mines, quarries, or other natural resources are situated.

(2) A resident or corporation or other entity of one of the contracting States deriving any such income from cources within the other contracting State may, for any taxable year, elect to be subject to the tax of such other contracting State as if such resident or corporation or other entity were engaged in trade or business within such other contracting State through a permanent establishment therein during such taxable

ARTICLE X

(2) Private pensions and life annuities derived from within one of the contracting States and paid to individuals residing in the other contracting State shall be exempt from taxation in the former State.

from taxation in the former State.
(3) The term "pensions" as used in this Article, means periodic payments made in consideration for services rendered or by way of compensation for injuries received.

of compensation for injuries received.

(4) The term "life annulities" as used in this Article means a stated sum payable periodically at stated times during life, or during a specified number of years, under an obligation to make the payments in return for adequate and full consideration in money or money's worth.

ARTICLE XII

(1) Dividends and interest paid by a Finnish corporation shall be exempt from United States tax except where the recipient is a citizen, resident or corporation or other entity of the United States.

(2) Dividends and interest paid by a United States corporation shall be exempt from Finnish tax except where the recipient is a resident or corporation or other entity of Finland.

ARTICLE XVII

The competent authorities of the contracting States shall exchange such information (being information available under the respective taxation laws of the contracting States) as is necessary for carrying out the provisions of the present Convention or for the prevention of fraud or the administration of statutory provisions against tax avoidance in relation to the taxen which are the subject of the present Convention. Any information so exchanged shall be treated as secret and shall not be disclosed to any person other than those concerned with the assessment and collection of the taxes which are the subject of the present Convention. No information shall be exchanged which would disclose any trade secret or trade process.

ARTICLE XVIII

Each of the contracting States may collect taxes, which are the subject of this Convention, imposed by the other contracting State (as though such tax were a tax imposed by the former State) as will ensure that the exemption or reduced rate of tax granted under the present Convention by such other States shall not be enjoyed by persons not entitled to such benefits.

ARTICLE XIX

The State to which application is made for information or assistance shall comply as soon as possible with the request addressed to it except that such State may refuse to comply with the request for reasons of public policy or if compliance would involve violation of a trade, business, industrial, or professional secret or trade process.

ARTICLE XXI

(1) The provisions of this Convention shall not be construed to deny or affect in any manner the right of diplomatic and consular officers to other or additional exemp-

tions now enjoyed or which may hereafter be granted to such officers.

(2) The provisions of the present Convention chall not be construed to restrict in any manner any exemption, deduction, credit or other allowance accorded by the laws of one of the contracting States in the determination of the tax imposed by such State

State.
(3) Should any difficulty or doubt arise as to the interpretation or application of the present Convention, or its relationship to Conventions between one of the contracting States and any other State, the competent authorities of the contracting States may cettle the question by mutual agreement.

ARTICLE XXII

(1) The competent authorities of the two contracting States may prescribe regulations necessary to interpret and carry out the provisions of this Convention. With respect to the provisions of this Convention relating to exchange of information and mutual assistance in the collection of taxes, such authorities may, by common agreement, prescribe rules concerning matters of procedure, forms of application and replies thereto, conversion of currency, disposition of amounts collected, minimum amounts subject to collection and related matters.

(2) The competent authorities of the two contracting States may communicate with each other directly for the purpose of giving effect to the provisions of this Convention.

ARTICLE XXIII

(1) The present Convention shall be ratified and the instruments of ratification shall be exchanged at Helsinki as soon as possible. It shall have effect for the taxable years beginning on or after the first day of January of the year in which such exchange takes place.

(2) The present Convention shall continue effective for a period of five years and indefinitely after that period, but may be terminated by either of the contracting States at the end of the five-year period, or at any time thereafter, provided that at least alx months' prior notice of termination has been given and, in such event, the present Convention shall cease to be effective for the taxable years beginning on or after the first day of January next following the expiration of the six-month period.

(b) As used in this subpart, any term defined in the convention shall have the meaning so assigned to it; any term not so defined shall, unless the context otherwise requires, have the meaning which such term has under the Internal Rev-

enue Code.

§ 7.701 Dividends—(a) General. (1) The rate of United States tax imposed by the Internal Revenue Code upon dividends derived from a domestic corporation and received in taxable years beginning on or after January 1, 1952, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Fin-land, or by a Finnish corporation or other entity, shall not exceed 15 percent under the provisions of Article VI of the convention if such alien, corporation, or other entity at no time during the taxable year in which such dividends are derived has engaged in trade or business within the United States through a permanent establishment situated therein. As to what constitutes a permanent establishment, see Article II (1) (c) of the convention.

(2) Thus, if a nonresident alien individual who is a resident of Finland per-

United States during the taxable year, but has at no time during such year a permanent establishment within the United States, he is entitled to the reduced rate of tax with respect to dividends derived in that year from a domestic corporation, as provided in Article VI of the convention, even though under the provisions of section 211 (b) of the Internal Revenue Code he has engaged in trade or business within the United States during such year by reason of his having performed personal services therein.

(b) Dividends paid by related corporation. (1) Under the proviso of Article VI (1) of the convention, dividends derived from a domestic corporation by a Finnish corporation which controls. directly or indirectly, at the time the dividend is paid 95 percent or more of the entire voting power in the corporation paying the dividend are, when received in taxable years beginning on or after January 1, 1952, subject to United States tax at a rate not in excess of 5 percent if (i) not more than 25 percent of the gross income of the paying corporation for the three-year period immediately preceding the taxable year in which the dividend is paid consists of dividends and interest (other than dividends and interest received by such paying corporation from its own subsidiary corpora-(ii) the relationship tions, if any) between the paying corporation and the Finnish corporation has not been arranged or maintained primarily with the intention of securing the reduced rate of 5 percent, and (iii) the Finnish corporation at no time during the taxable year in which such dividends are derived has engaged in trade or business within the United States through a permanent establishment situated therein.

(2) Any domestic corporation which claims or contemplates claiming that dividends paid or to be paid by it are subject to a rate not in excess of 5 percent shall file the following information with the Commissioner of Internal Revenue as soon as practicable: (i) The date and place of its organization; (ii) the number of outstanding shares of stock of the domestic corporation hav-ing voting power and the voting power thereof; (iii) the person or personsbeneficially owning such stock of the domestic corporation and their relationship to the Finnish corporation; (iv) the amount of the gross income by years of the domestic corporation for the three-year period immediately preceding the taxable year in which the dividend is paid; (v) the amount of interest and dividends by years included in the gross income of the domestic corporation, and the amount of interest and dividends by years received by such corporation from its own subsidiary corporations, if any and (vi) the relationship between the domestic corporation and the Finnish corporation deriving the dividend.

(3) As soon as practicable after such information is filed, the Commissioner will determine whether the dividends concerned fall within the scope of the proviso of Article VI (1) of the conven-

forms personal services within the tion and may authorize the release or refund of excess tax withheld with respect to dividends which come within such proviso. For additional require-ments respecting the refund of excess tax withheld during 1952, see § 7.710.

(4) In any case in which the Commissioner has notified the domestic corporation that the dividends fall within the scope of the proviso of Article VI (1) of the convention, the reduced withholding rate of 5 percent, to the extent withholding of United States tax is required, shall apply to any dividends subsequently paid by such corporation and derived by the Finnish corporation, unless the stock ownership of the domestic corporation, or the character of its income, materially changes; or unless the Commissioner determines that the relationship between the two corporations concerned is being maintained primarily with the intention of securing the reduced rate of tax. In such instance, if such change in stock ownership or character of income occurs. the domestic corporation shall promptly notify the Commissioner of the then existing facts with respect thereto. The continued application of the rate not in excess of 5 percent-is also dependent upon the continued fulfillment of subdivision (iii) of subparagraph (1) of this paragraph.

(c) Effect of address in Finland on withholding in the case of dividends. For the purpose of withholding of United States tax in the case of dividends every nonresident alien (including a nonresident alien individual, fiduciary, and partnership) whose address is in Finland shall be deemed by United States withholding agents to be a nonresident alien who is a resident of Finland not engaged in trade or business within the United States through a permanent establishment situated therein; and every foreign corporation whose address is in Finland shall be deemed by such withholding agents to be a Finnish corporation not engaged in trade or business within the United States through a permanent es-

tablishment situated therein. (d) Rate of withholding.

holding at source in the case of dividends derived from a domestic corporation and paid on or after January 1, 1953, to nonresident aliens (including a nonresident alien individual, fiduciary, and partnership) and to foreign corporations, whose addresses are in Finland, shall be at the rate of 15 percent in every case except that in which, prior to the date of payment of such dividends, the Commissioner of Internal Revenue has (i) pursuant to paragraph (b) of this section notified the domestic corporation that such dividends fall within the scope of the proviso of Article VI (1) of the convention or (ii) notified the withholding agent that the reduced rate of withhold-

ing shall not apply. (2) The preceding provisions respecting the application of the reduced withholding rate in the case of dividends paid to nonresident aliens and foreign corporations with addresses in Finland are based upon the assumption that the payee of the dividend is the actual owner of the capital stock from which the dividend is derived and consequently is the

person liable to United States tax upon such dividend. As to action by the recipient who is not the owner of the dividend, see § 7.707.

(3) The rate at which United States tax has been withheld from any dividend paid at any time after the expiration of the thirtieth day after the date on which this subpart is published in the FEDERAL REGISTER to any person whose address is in Finland at the time the dividend is paid shall be shown either in writing or by appropriate stamp on the check, draft, or other evidence of payment, or on an accompanying statement.

(4) In the case of dividends paid on or after January 1, 1952, by a Finnish corporation no withholding of United States tax is required. See Article XII (1) of

the convention.

§ 7.702 Interest—(a) General. terest on bonds, securities, notes, debentures, or on any other form of indebtedness, including interest on obligations of the United States, obligations of instrumentalities of the United States, and mortgages and bonds secured by real property, which is derived from sources within the United States and received in taxable years beginning on or after January 1, 1952, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Finland, or by a Finnish corporation or other entity, is exempt from United States tax under the provisions of Article VII of the convention if such alien, corporation, or other entity at no time during the taxable year in which such interest is derived has a permanent establishment in the United States. Such interest is, therefore, not subject to the withholding of United States tax at source. As to what constitutes a permanent establishment, see Article II (1) (c) of the convention.

(b) Application of exemption from withholding. (1) To avoid withholding of United States tax at source in the case of coupon bond interest the nonresident alien who is a resident of Finland, or the Finnish corporation or other entity, shall for each issue of bonds file Form 1001-FIN in duplicate when presenting the interest coupons for payment. This form shall be signed by the owner of the interest, trustee, or agent and shall show the name and address of the obligor, the name and address of the owner of the interest, and the amount of the interest. It shall contain a statement that the owner (i) is a resident of Finland, or is a Finnish corporation or other entity, and (ii) has no permanent establishment in

the United States.

(2) The exemption from United States tax contemplated by Article VII of the convention, insofar as it concerns coupon bond interest, is applicable only to the owner of the interest. The person prosenting the coupon or on whose behalf it is presented shall, for the purpose of the exemption from tax, be deemed to be the owner of the interest only if he is, at the time the coupon is presented for payment, the owner of the bond from which the coupon has been detached. If the person presenting the coupon or on whose behalf it is presented is not the

owner of the bond, Form 1001, and not Form 1001-FIN, shall be executed.

(3) The original and duplicate of Form 1001-FIN shall be forwarded by the withholding agent to the Commissioner of Internal Revenue, Uniform Audit Branch, Alien Returns Section, Washington 25, D. C., with the quarterly return on Form 1012, as provided in § 29.143-7 of this chapter with respect to Form 1001. Form 1001-FIN need not be listed on Form 1012.

(4) For general provisions pertaining to the use, without reference to the provisions of the convention, of ownership certificate, Form 1001, by nonresident aliens and nonresident foreign corporations, see §§ 29.143-4 and 29.143-6 of

this chapter.

(5) To avoid withholding of United States tax at source in the case of interest, other than coupon bond interest, the nonresident alien who is a resident of Finland, or the Finnish corporation or other entity, shall notify the withholding agent by letter in duplicate that such income is exempt from United States tax under the provisions of Article VII of the convention. The letter of notification shall be signed by the owner of the interest, trustee, or agent and shall show the name and address of the obligor and the name and address of the owner of the interest. It shall contain a statement (i) that the owner is neither a citizen nor a resident of the United States but is a resident of Finland, or, in the case of a corporation or other entity, (ii) that the owner is a Finnish corporation or other entity and, in addition, a statement that the owner has at no time during the current taxable year had a permanent establishment in the United States.

(6) This letter of notification, which shall constitute authorization for the payment of such interest without withholding of United States tax at source. shall be filed with the withholding agent for each successive three-calendar-year period during which such income is paid. For this purpose, the first such period shall commence with the beginning of the calendar year in which such income is first paid on or after January 1, 1953. Each such letter filed with any withholding agent shall be filed not later than 20 days preceding the date of the first payment within each successive period, or, if that is not possible because of special circumstances, as soon as possible after

such first payment.

(7) If such letter is also to be used as authorization for the release, pursuant to § 7.706 (a) of excess tax withheld from interest, other than coupon bond interest, it shall also contain a statement that, at the time when the interest was derived from which the excess tax was withheld, (i) the owner was neither a citizen nor a resident of the United States but was a resident of Finland, or, in the case of a corporation or other entity, (ii) the owner was a Finnish corporation or other entity and, in addition, a statement that the owner at no time during the taxable year in which such interest was derived had a permanent establishment in the United States.

(8) Once a letter has been filed in respect of any three-calendar-year period, no additional letter need be filed in respect thereto unless the Commissioner of Internal Revenue notifies the withholding agent that an additional letter shall be filed by the taxpayer. If, after filing a letter of notification, the taxpayer ceases to be eligible for the exemption from United States tax provided by the convention in respect to such interest, he shall promptly notify the withholding agent by letter in duplicate. When any change occurs in the ownership of the interest as recorded on the books of the payer, the exemption from withholding of United States tax shall no longer apply unless a letter of notification is duly executed and filed with the withholding agent by the new owner of record of such interest.

(9) Each letter of notification, or the duplicate thereof, shall be immediately forwarded by the withholding agent to the Commissioner of Internal Revenue, Uniform Audit Branch, Alien Returns Section, Washington 25, D. C.

(10) In the case of interest paid on or after January 1, 1952, by a Finnish corporation no withholding of United States tax is required. See Article XII (1) of the convention.

§ 7.703 Copyright royalties—(a) General. (1) Royalties for the right to use copyrights or in respect of the right to produce or reproduce any literary, dramatic, musical, or artistic work which are derived from sources within the United States and received in taxable years beginning on or after January 1, 1952, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Finland, or by a Finnish corporation or other entity, are exempt from United States tax under the provisions of Article VIII of the convention if such alien, corporation, or other entity at no time during the taxable year in which such royalties are derived has engaged in trade or business within the United States through a permanent establishment situated therein. Such royalties are, therefore, not subject to the withholding of United States tax at source. As to what constitutes a permanent establishment, see Article II (1) (c) of the convention.

(2) The provisions of this section shall have no application to rents or royalties in respect of motion picture films.

(b) Application of exemption from withholding. (1) To avoid withholding of United States tax at source in the case of the royalties to which paragraph (a) of this section is applicable, the nonresident alien who is a resident of Finland. or the Finnish corporation or other entity, shall notify the withholding agent by letter in duplicate that such royalties are exempt from United States tax under the provisions of Article VIII of the convention. The provisions of § 7.702 (b) relating to the execution, filing, and effective period of the letter of notification prescribed therein with respect to interest, including its use for the release of excess tax withheld, are equally applicable with respect to the income falling within the scope of this section.

(2) Each letter of notification, or the duplicate thereof, shall be immediately forwarded by the withholding agent to the Commissioner of Internal Revenue. Uniform Audit Branch, Alien Returns Section, Washington 25, D. C.

§ 7.704 Natural resource royalties and real property rentals. The convention does not change the rate of United States tax imposed pursuant to sections 211 and 231 of the Internal Revenue Code upon natural resource royalties and real property rentals. The withholding of United States tax with respect to such items derived from sources within the United States by nonresident aliens who are residents of Finland, or by Finnish corporations or other entities, is not changed by the convention. See sections 143 (b) and 144 of the Internal Revenue Code and Article IX of the convention.

§ 7.705 Pensions and life annuities-(a) General. Private pensions and life annuities, as defined in Article X (3) and (4) of the convention, derived from sources within the United States and paid in taxable years beginning on or after January 1, 1952, to a nonresident allen individual who is a resident of Finland are exempt from United States tax under the provisions of Article X (2) of the convention. Such items of income are, therefore, not subject to the withholding of United States tax at source.

(b) Application of exemption from withholding. (1) To avoid withholding of United States tax at source in the case of the items of income to which paragraph (a) of this section is applicable. the nonresident alien individual who is a resident of Finland shall notify the withholding agent by letter in duplicate that such income is exempt from United States tax under the provisions of Article X of the convention. The letter of notification shall be signed by the owner of the income, shall show the name and address of both the payer and the owner of the income, and shall contain a statement that the owner, an individual, is neither a citizen nor a resident of the United States but is a resident of Finland.

(2) If such letter is also to be used as authorization for the release, pursuant to § 7.706 (a) of excess tax withheld from such items of income, it shall also contain a statement that the owner was, at the time when the income was paid from which the excess tax was withheld. neither a citizen nor a resident of the United States but was a resident of

Finland.

(3) This letter shall constitute authorization for the payment of such items of income without withholding of United States tax at source unless the Commissioner of Internal Revenue subsequently notifies the withholding agent that the tax shall be withheld with respect to payments of such items of income made after receipt of such notice. If, after filing a letter of notification, the owner of the income ceases to be eligible for the exemption from United States tax provided by the convention in respect to such income, he shall promptly notify the withholding agent by letter in duplicate. When any change occurs in the ownership of such income as recorded on the books of the payer, the exemption from withholding of United States tax shall no longer apply unless a letter of

notification is duly executed and filed with the withholding agent by the new owner of record of such income.

(4) Each letter of notification, or the duplicate thereof, shall be immediately forwarded by the withholding agent to the Commissioner of Internal Revenue, Uniform Audit Branch, Alien Returns Section, Washington 25, D. C.

§ 7.706 Release of excess tax withheld at source—(a) General. (1) In order to give the convention effective application at the earliest practicable date, the exemptions from, and reductions in rate of, withholding of United States tax at source granted by this subpart are hereby made effective beginning January 1, 1953, contingent upon compliance with the applicable provisions of §§ 7.701 through 7.705.

(2) In the case of dividends derived from a domestic corporation and paid to a nonresident-alien (including a nonresident alien individual, fiduciary, and partnership) or to a foreign corporation, whose address at the time of payment was in Finland, where United States tax at the statutory rate (30 percent as of the date of approval of this subpart) has been withheld from such dividends on or after January 1, 1953, there shall be released (except as provided in paragraph (b) of this section) by the withholding agent and paid over to the person from whom it was withheld an amount, which is equal to the amount obtained by subtracting 15 percent of such dividends from the tax so withheld.

(3) In the case of every taxpayer whose address at the time of payment was in Finland and who furnishes to the withholding agent the letter of notification prescribed in §§ 7.702 (b) 7.703 (b) and 7.705 (b) as authorization for the release of excess tax withheld, where United States tax at the statutory rate (30 percent as of the date of approval of this subpart) has been withheld on or after January 1, 1953, from interest (other than coupon bond interest) copyright royalties and the like, and from private pensions and life annuities as defined in Article X, there shall be released by the withholding agent and paid over to the person from whom it was withheld an amount equal to the tax so withheld from such items.

(4) In the case of every taxpayer whose address at the time of paymentwas in Finland and who furnishes to the withholding agent Form 1001-FIN clearly marked "Substitute" and executed in accordance with § 7.702 (b) where United States tax at the statutory rate (28 percent or 30 percent, as the case may be, as of the date of approval of this subpart) has been withheld from coupon bond interest on or after January 1, 1953, there shall be released by the withholding agent and paid over to the person from whom it was withheld an amount equal to the tax so withheld from such interest. One such substitute form shall be filed in duplicate with respect to each issue of bonds and will serve with respect to that issue to replace all Forms 1001 previously filed by the taxpayer in the calendar year in which

the excess tax was withheld and with respect to which such excess is released.

(5) The original and duplicate of substitute Form 1001-FIN shall be forwarded by the withholding agent to the Commissioner of Internal Revenue, Uniform Audit Branch, Alien Returns Section, Washington 25, D. C., with the quarterly return on Form 1012, as provided in § 29.143-7 of this chapter with respect to Form 1001. Substitute Form 1001-FIN need not be listed on Form 1012.

(6) The provisions of this section shall have no application to excess tax withheld at source which has been paid by the withholding agent to the district director of internal revenue pursuant to § 29.143-7 of this chapter.

(b) Dividends paid by related corporation. In the case of every domestic corporation receiving notification from the Commissioner of Internal Revenue under the provisions of § 7.701 (b) that dividends paid or to be paid by it fall within the scope of the proviso of Article VI (1) of the convention, where United States tax in excess of the applicable rate of 5 percent has been withheld on or after January 1, 1953, from dividends which come within the scope of such proviso, the withholding agent shall, if so authorized in such notification, release and pay over to the corporation from which it was withheld the excess tax witheld with respect to such dividends.

(c) Amounts withheld during 1952. For provisions respecting the refund of excess tax withheld during the calendar year 1952, see § 7.710.

§ 7.707 Addressee not actual owner-(a) General. (1) If the recipient in Finland of any dividend from a United States corporation, with respect to which United States tax at the reduced rate of 15 percent has been withheld at source pursuant to § 7.701 (d) is a nominee or representative through whom such dividend flows to a person other than one described in § 7.701 (a) as being entitled to such reduced rate, such recipient in Finland shall withhold an additional amount of United States tax equivalent to the United States tax which would have been withheld if the convention had not been in effect (30 percent of such dividend as of the date of approval of this subpart) minus the 15 percent which has been withheld at the source.

(2) In any case in which a fiduciary or partnership with an address in Finland receives, otherwise than as a nominee or representative, a dividend from a United States corporation with respect to which United States tax at the reduced rate of 15 percent has been withheld at source pursuant to § 7.701 (d) if a beneficiary of such fiduciary or a partner in such partnership is not entitled to the reduced rate of tax granted by Article VI (1) of the convention, the fiduciary or partnership shall withhold an additional amount of United States tax with respect to the portion of such dividend included in such beneficiary's share of the distributed or distributable income, or in such partner's distributive share of the income, of such fiduciary or partnership, as the case may be. The

amount of the additional tax is to be calculated in the same manner as under subparagraph (2) of this paragraph.

(3) If any amount of United States tax is released pursuant to § 7.706 (a) by the withholding agent in the United States with respect to a dividend paid to such a person (nominee, representative, fiduciary, or partnership) with an address in Finland, the latter shall also withhold from such released amount any additional amount of United States tax, otherwise required to be withheld by the preceding provisions of this section in respect of such dividend, in the same manner as if at the time of payment of such dividend United States tax at the rate of only 15 percent had been withheld at source therefrom.

(b) Returns filed by Finnish withholding agents. The amounts so withheld pursuant to paragraph (a) of this section by such withholding agents in Finland shall be deposited, without converting such amounts into United States dollars, with the Finnish Taxation Department of the Ministry of Finance on or before the 15th day after the close of the quarter of the calendar year in which such withholding in Finland occurs. Each withholding agent making such deposit shall render therewith the appropriate Finnish form as prescribed by the Taxation Department of the Ministry of Finance. That Department has arranged that the amounts so deposited will be remitted by draft in United States dollars to the District Director of Internal Revenue, Baltimore, Maryland, U. S. A., on or before the end of the calendar month in which the deposits are made, such draft to be accompanied by the Finnish form rendered by the withholding agents in Finland in connection with such deposits.

§ 7.708 Information to be furnished in ordinary course. - (a) In compliance with the provisions of Article XVII of the convention the Commissioner of Internal Revenue will transmit to the Finnish Taxation Department of the Ministry of Finance, as soon as practicable after the close of the calendar year 1953 and of each subsequent calendar year during which the convention is in effect, the following information relating to such preceding calendar year:

(b) The name and address of each person, whose address as disclosed on each available Form 1012 and Form 1042 is in Finland, deriving from sources within the United States dividends, interest, rent, royalties, salaries, wages, pensions, annuities, and other fixed or determinable annual or periodical income; and the amount of such income as disclosed on such form with respect to each such person; and

(2) The duplicate copy of each available ownership certificate, Form 1001–FIN, filed pursuant to § 7.702 (b), and substitute form 1001–FIN, filed pursuant to § 7.706 (a), in connection with coupon bond interest.

(b) To facilitate compliance with Article XVII of the convention, every United States withholding agent shall report on Form 1042 for the calendar year 1953 and each subsequent calendar year, in addition to the items of income

required to be listed on such form pursuant to § 29.143-7 of this chapter, all other items of fixed or determinable annual or periodical income derived from sources within the United States and paid to nonresident aliens (including nonresident alien individuals, fiduciaries, and partnerships) and to nonresident foreign corporations, whose addresses at the time of payment were in Finland, including such items of income upon which, in accordance with this subpart, no withholding of United States tax is required; except that any item of interest in respect of which Form 1001-FIN or substitute Form 1001-FIN has been filed in duplicate with the withholding agent is not required to be reported on such form.

Beneficiaries of a domestic § 7.709 estate or trust. A nonresident alien who is a resident of Finland and who is a beneficiary of a domestic estate or trust shall be entitled to the exemption from, or reduction in the rate of, United States tax granted by Articles VI, VIII, VIII, and XII of the convention with respect to dividends, interest, and copyright royalties and the like, to the extent such item or items are included in his share of the distributed or distributable income of such estate or trust. In order to be entitled in such instance to the exemption from, or reduction in the rate of, withholding of United States tax such beneficiary must otherwise satisfy the requirements of these respective articles of the convention and shall, where applicable, execute and submit to the fiduciary of such estate or trust in the United States the appropriate letter of notification prescribed in §§ 7.702 (b) and 7.703 (b).

§ 7.710 Refund of excess tax withheld during 1952. (a) If United States tax withheld at the source during the year 1952 from dividends, interest, copyright royalties and the like, pensions, or life annuities is in excess of the tax imposed by Chapter 1 (relating to the income tax) of the Internal Revenue Code, as modified by the convention, a claim by the taxpayer for the refund of any overpayment shall be made under section 322 of the Internal Revenue Code by filing Form 843 together with Form 1040NB, Form 1040NB-a, Form 1040B, Form 1120, or Form 1120NB, whichever is applicable. or with an amended return.

(b) The taxpayer's total gross income from sources within the United States, including every item of capital gain subject to tax under the provisions of section 211 (a) (1) (B) or 211 (c) of the Internal Revenue Code, shall be disclosed on the return. In the event that securities are held in the name of a person other than the actual or beneficial owner. the name and address of such person shall be furnished with the claim. There shall also be included in such claim for refund:

(1) A statement that, at the time when the item or items of income were derived (or "paid", in the case of private pensions and life annuities) from which the excess tax was withheld, (i) the taxpayer was neither a citizen nor a resident of the United States but was a resident of Fin-

land, or, in the case of a corporation or other entity, (ii) the taxpayer was a Finnish corporation or other entity and

(2) A statement that the taxpayer at no time during the taxable year in which the income was derived was engaged in trade or business within the United States through a permanent establishment situated therein.

(c) If, however, the taxpayer is an individual who during the taxable year derived from sources within the United States income which consists exclusively of pensions or life annulties entitled to the benefit of Article X of the convention, the statement specified in paragraph (b) (1) of this section shall not be required.

(d) As to additional information required in the case of a Finnish corporation claiming the benefit of the 5 percent rate on dividends paid by a domestic corporation, see § 7.701 (b).

Because it is necessary to bring into effect at the earliest practicable date the rules of this Treasury decision respecting release or refund of excess tax withheld, and exemption from, or reduction in rate of, withholding of tax, it is hereby found that it is impracticable to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of that act.

[SEAL] T. COLEMAN AMBREWS, Commissioner of Internal Revenue.

Approved: July 10, 1953.

M. B. Folsom, Acting Secretary of the Treasury.

TITLE 32—NATIONAL DEFENSE Chapter V—Department of the Army

Subchapter F-Personnel

PART 573—APPOINTMENT OF COMMISSIONED OFFICERS AND WARRANT OFFICERS

GENERAL ELIGIBILITY REQUIREMENTS

In § 573.10, paragraph (c) is rescinded and the following substituted therefor:

§ 573.10 General eligibility requirements. • • •

(c) Except as indicated in pertinent special regulations, possess a baccalaureate degree gained through attendance at a college or university recognized through accreditation (as evidenced in part 3, current Educational Directory, United States Office of Education). Applicants covered in subparagraphs (1) and (2) of this paragraph must possess additional requirements as indicated.

(1) Applicants under the technical specialist program must possess a master's or doctor's degree recognized through above-prescribed accreditation. Individuals who do not have a master's or doctor's degree may request waiver of such advanced degree requirement, provided they possess a bachelor's degree and have at least 3 years practical civilian experience in the appropriate field of technical specialty; waivers may be granted if such experience is acceptable to the Department of the Army.

(2) Applicants for appointment in the several corps listed in paragraph (b) (1) through (8) of this section are required to have had certain technical or professional training, details of which are specified in pertinent Special Regulations.

Chapter VII—Department of the Air Force

Subshapter G-Personnel

PART 883-AUTHORIZATION OF GRADES FOR ENLISTMENT IN THE REGULAR AIR FORCE

Part 883 (32 CFR Part 883), including the caption thereof, is revised as follows:

833.1

Purpose. Eligibility. 833.2

Grades authorized.

Date of grade.

AUTHOMITY: \$\$ 833.1 to 833.4 issued under R. S. 161; cec. 202, 61 Stat. 500, as amended; 5 U.S. C. 22, 1713. Interpret or apply sec. 27, 39 Stat. 185, as amended; sec. 5, 59 Stat 533, cec. 305, 62 Stat. 372; 10 U. S. C. 623, 636; 5 U.S. C. 627d.

Bounce: AFR 33-25.

Purpose. Sections 883.1 to 883.4 establish the criteria and procedure for the authorization of grades for enlistment in the Regular Air Force of persons with prior service in the Army, Navy, Air Force, Coast Guard, or Marine Corps, whose last period of service was in an enlisted status and who are not eligible for a higher grade under the provisions of Part 871 of this chapter (18 F. R. 30) at the time of enlistment.

§ 883.2 Eligibility. Applicants for grade determination must be fully qualified for enlistment under the provisions of Part 871 of this chapter (18 F. R. 30)

§ 883.3 Grades authorized—(a) For persons whose last period of service was in the Regular Air Force. Persons whose last period of service was in the Regular Air Force may be authorized grades for enlistment as follows:

(1) Airmen separated in permanent or temporary grades E-5, E-6, or E-7 who enlist within 12 months from date of separation may be enlisted one grade lower than their permanent grade and promoted to a temporary grade one grade lower than the temporary grade held at time of separation, at the time and place of enlistment, except that the grade in which enlisted will not be lower than grade E-4, except as provided in subparagraph (4) of this paragraph.

(2) Airmen separated in permanent or temporary grade E-5, E-6, or E-7 who enlist after 12 months and within 24 months from date of separation may be enlisted two grades lower than their permanent grade and promoted to a temporary grade two grades lower than the temporary grade held at the time of separation, at the time and place of enlistment, except as provided in subparagraph (4) of this paragraph. In any instance where compliance with the provisions of §§ 883.1 to 883.4 would result in an enlistee being promoted to a grade E-3 or E-4, enlistee will be enlisted in the appropriate grade in place of promotion to that grade.

(3) Airmen separated in grade E-4 who enlist within 12 months from date of separation may be enlisted in grade

(4) Airmen-last discharged under paragraph 5, AR 615-367, September 13, 1948, or paragraph 5, AFR 39-15, April 19, 1951, will be enlisted in grade E-2.

(b) For Air Force Reservists and Air National Guardsmen who have been on active service. Air Force Reservists, and Air National Guardsmen who have served with the Regular Air Force for a continuous period of 12 months or longer may be authorized grades for enlistment as follows:

(1) Airmen who were separated from active service in grade E-5, E-6, or E-7 who enlist within 12 months from date of separation, may be enlisted one grade lower than the grade held January 31, 1951 and promoted to a temporary grade two grades lower than the temporary, grade held at the time of separation from active service, except that the grade in which enlisted will not be lower than grade E-4.

(2) Airmen who were separated from active service in grade E-5, E-6, E-7 who enlist after 12 months and within 24 months from date of separation from active service may be enlisted two grades lower than the grade held January 31, 1951 and promoted to a temporary grade two grades lower than the temporary grade held at the time of separation from active service. In any instance where compliance with the provisions of §§ 883.1 to 883.4 would result in an en-

listee being promoted to grade E-3 or

E-4, enlistee will be enlisted in the appropriate grade in place of promotion to that grade.

(3) Airmen who were separated from active service in grade E-4 who enlist before 12 months from date of separation from active service may be enlisted in grade E-3.

(c) For persons whose last period of service was in the Regular Army, Regular Navy, Regular Coast Guard, or Regular Marine Corps. (1) Except as provided in subparagraphs (3) and (4) of this paragraph, applicants whose last period of service was in the Regular Army, Regular Navy, Regular Coast Guard, or Regular Marine Corps, separated in permanent or temporary grade E-5, E-6, or E-7, who enlist within 12 months of date of separation may be enlisted in grade E-4. Those persons separated in grade E-4 who enlist within 12 months of date of separation may be enlisted in grade E-3.

(2) Except as provided in subparagraph (4) of this paragraph, applicants whose last period of service was in any of the Armed Forces indicated in subparagraph (1) of this paragraph separated in permanent or temporary grade E-5, E-6, or E-7, who enlist after 12 months and within 24 months from date of separation may be enlisted in grade E-3.

(3) Except as provided in subparagraph (4) of this paragraph, applicants, whose last period of service was in any of the Armed Forces indicated in subparagraph (1) of this paragraph, may be authorized a grade in the Regular Air Force, provided that they were separated in grade E-5, E-6, or E-7, and they can furnish official proof that, at the time of discharge, they held a primary Army or Marine Corps Military Occupational Specialty/Specification Serial Number or a Navy or Coast Guard title and code. The grade will be determined as follows:

(i) Applicants who enlist in the Air Force within 90 days of the date of their discharge may be enlisted in grade E-4, and be promoted (temporary) at the time and place of enlistment to the permanent or temporary grade held at

time of discharge, except that promotions will not be authorized to a grade higher than E-6.

(ii) Applicants who enlist after 90 days and before 12 months from date of discharge may be enlisted in grade E-4 and promoted (temporary) to a grade one grade lower than the permanent or temporary grade held at time of discharge,

(4) Former Army personnel last discharged under paragraph 5, AR 615-367, September 13, 1948, will be enlisted in grade E-2.

(d) For Reservists or National Guardsmen who have been on active service with the Regular Army, Regular Navy, Regular Coast Guard, or Regular Marine Corps. Reservists or National Guardsmen who have served with the Regular Army, Regular Navy, Regular Coast Guard, or Regular Marine Corps for a continuous period of 12 months or longer may be authorized grades for enlistment as follows:

(1) Those persons separated in grade E-5, E-6, or E-7 who enlist within 12 months of date of separation from active service may be enlisted in grade E-4. Those persons separated in grade E-4 who enlist within 12 months of date of separation from active service may be enlisted in grade E-3.

(2) Those persons separated in grade E-5, E-6, or E-7 who enlist after 12 months and within 24 months from date of separation from active service may be enlisted in grade E-3.

(e) For other persons. Persons who are not specifically authorized a grade under the provisions of Part 871 of this chapter (18 F R. 30) or this part will be enlisted in grade E-1 under Part 871 of this chapter.

§ 883.4 Date of grade. The date of grade for personnel enlisted under this part will be the date of enlistment.

[SEAL]

K. E. THIEBAUD, Colonel, U. S. Air Force, Air Adjutant General.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 943].

[Docket No. AO-231-A3]

HANDLING OF MILK IN NORTH TEXAS
MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S. C. 601 et seq.) and the applicable rules of practice and procedure, as amended, govern-

ing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900) a public hearing was conducted at Dallas, Texas, on November 18–25, 1952, pursuant to notice thereof which was issued on October 29, 1952 (17 F R. 9896)

Upon the basis of the evidence introduced at the hearing and the record thereof the Assistant Administrator, Production and Marketing Administration, on April 15, 1953, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision. This decision and notice of opportunity to file written exceptions thereto was published in the Federal Register on April 18, 1953 (18 F R.

The material evidence in the record of hearing related to proposals with respect to:

(1) Clarification and changes in the qualifications for producers and plants which determine the milk to be priced and pooled:

(2) Extension of the marketing area,

(3) Changes in the classification of milk;

(4) Class prices;

(5) Basing points for Class prices and location differentials to handlers and to producers:

(6) Butterfat differentials to producers:

(7) Payments to be required of handlers who use other source milk for Class I sales;

(8) Advance payments to producers; (9) Revisions of the base payment plan; and

(10) Administrative provisions of the order.

The notice of hearing contained proposals with respect to the computation of two pools for December milk, payments to be required of handlers using other source milk for Class I use when producer milk is available, the obligations of handlers also regulated by other Federal orders, and limitations with respect to reports to be required and audits to be made with respect to dual purpose plants. No evidence was offered in support of such proposals.

Findings and conclusions. The following findings and conclusions are made on the basis of the evidence at the hearing and the record thereof:

1. Qualifications of producers and plants for inclusion in the pool. Several proposals were made to amend the definitions of "producer" and "approved plant" which determine the milk to be priced and pooled under the order.

(a) Producer qualifications. The definition of "producer" in the order should be amended to clearly indicate that the farmers whose milk is priced and pooled are approved by the applicable health authorities having jurisdiction in the marketing area for the production of milk for consumption as Grade A milk. Specific limitations should not be placed in the order at this time as to the periods within which a producer may retain his status while his milk is diverted to an unapproved plant.

The present order provides that, with certain limitations, a producer shall be a person who produces milk which is received directly from the farm at an "approved plant," or is caused to be diverted by a handler to an unapproved plant. The limitations relate to circumstances. such as operation of dual purpose plants and receipts for manufacturing use during temporary periods of degrading, under which receipt of milk at an "approved plant" may not indicate that the appropriate health authority approves such milk for disposition for fluid consumption as Grade A milk, and provide that under such circumstances status as a producer under the order is dependent upon the production of milk currently approved by an appropriate health authority for Grade A use. Administration of the order obligates the market administrator to require all handlers to submit evidence of approval by health authorities of the individual producers to be included in the pool.

It was proposed that the producer definition require the holding of a Grade A permit or rating issued by the appropriate health authority. The issuance of Grade A permits to producers is the method used by most health authorities of the North Texas marketing area to identify those producers approved, but instances, were shown on the record where approvals had been given without formal issuance of permits.

It is concluded that the qualifications of producers should include approval of a health authority having jurisdiction in the marketing area for the production of milk for consumption as Grade A milk,

in addition to delivery of mill: directly from the farm to an approved plant. Such change will indicate clearly the intention of the order to price and pool only the mills of those farmers recognized by such health authorities as regular sources of supply of Grade A mills for the market. As at present handlers would be required to provide the market administrator with satisfactory evidence that the appropriate health authorities have issued the appropriate approval.

It was also proposed that a producer whose milk was diverted to an unapproved plant for more than five days during any of the months of September through February should not retain his status as a producer while his milk was so diverted. In support of this proposal it was contended that these were months of short supply during which there had so far been no necessity for diversion of producer milk to unapproved plants. The limit of five days was proposed to take care of emergency conditions and week-end short sales. While the proposal might assist in the distribution of producer milk to plants needing it for Class I use, it could affect the orderly handling of milk in periods of sudden changes in supplies or sales of milk. It is concluded that the proposal should not be adopted on the basis of the need shown on this record.

(b) Plant qualifications. The order presently defines "approved plants" as those (1) approved by any health authority having jurisdiction in the marketing area from which items named in the order as Class I milk labeled "Grade A" are disposed of for fluid consumption in the marketing area on wholesale or retail routes (including plant stores) or (2) approved by and under the routine inspection of the appropriate health authority of any municipal corporation in the marketing area, and which serve as a receiving station for such a plant.

With respect to plants from which milk is disposed of on routes it was proposed that a "route" should be more precisely defined and that such plants be required to dispose of not less than 15 percent of their total Grade A recelpts as Class I milk on routes in the marketing area, if such recelpts were to be included in the market-wide pool. With respect to receiving plants it was proposed that such plants be required to dispose of specified percentages (varied seasonally) of their Grade A recelpts as Class I milk if such recelpts were to be pooled.

A definition of "route" should be included in the order to specify more precisely the character of the distribution which makes a plant subject to the regulation of the order. The two points with respect to which the record indicates need for clarification concern (1) distribution on routes operated by vendors which are not owned nor supervised by the operator of the plant from which the milk is distributed, and (2) the extent to which deliveries to a mill: plant should be considered to come within the definition of a "route." The record is convincing that a plant from which milk is distributed for fluid consumption in the marketing area on routes operated by vendors should be regulated, and that

the present language of the order be made specific in this respect. The term "route" is defined as any delivery (including any delivery by a vendor or disposition at a plant store) of products specified in the order as Class I milk, other than a delivery in bulk to a milk processing plant. The exclusion of deliveries in bulk to a milk processing plant from the term route is in order to exclude from the regulation of the order plants whose only deliveries in the area are to mill: plants, either for manufacturing use or as supplementary supplies for fluid use of regulated plants. Deliveries to milk plants other than in bulk form are seldom in the nature of supplementary supplies. The plant at which the mill: is packaged and from which it is delivered to the second plant presum-ably must have the same approval of health authorities as do plants which distribute directly to wholesale and retail outlets. Accordingly the exclusion of deliveries to milk plants from the definitions of "route" is restricted to deliveries in bulk form.

The order should not be amended at this time to require that a plant from which mill: is disposed of on routes dispose of a specified percentage of its Grade A receipts on such routes in the marketing area before receipts at such plants are included in the pool. Much of the testimony with respect to need for such a provision was based upon contingencies that might arise if certain proposals to expand the marketing area were adopted. It is concluded in this decision that such proposals should not be adopted at this time.

In the case of plants which do not operate routes in the marketing area the order should provide that such plants have a substantial association with the market. Receipts of milk from dairy farmers at plants which do not engage directly in route disposition of milk in the marketing area should be included in the market pool only if such receipts are identified as a regular and dependable part of the milk supply for the area. In order to have sufficient volume of sales to be identified with the market the plant would need to have approval by one of the major municipalities in the marketing area. The record indicates that the only receiving plants so far recognized in the North Texas market have been those approved for the City of Dallas. The only other municipality of comparable size in the marketing area is Fort Worth. Milk under the inspection. of Dallas and Fort Worth health authorities is distributed extensively throughout the marketing area, thus indicating that it is acceptable for use throughout the marketing area. It is concluded, therefore, that the requirements for pooling specify the Dallas and Ft. Worth health authorities as the agencies whose approval is required for plants which do not operate routes in the marketing area.

Some evidence of substantial shipments of milk to plants which regularly distribute milk on routes in the marketing area should be required of receiving plants which do not have direct distribution to consumers in the marketing area. The record indicates that

milk moves over large distances from farm to plant, between plants, and from plant to consumer in this region. Therefore, the milk received at any particular plant cannot be clearly recognized as a regular supply for the North Texas market if milk is moving out from the same plant to nearby markets. Its identity with the North Texas market should be defined in terms of the percentage of milk received at the plant which is shipped to the plants which distribute milk directly in the North Texas marketing area. Shipments of milk to be considered in determining the qualification of such plants should be closely related to the needs of the receiving plant for Class I use. This will avoid encouraging uneconomic movements of milk as a means of establishing or retaining approved plant status.

Special standards should be provided for determining the relation of milk moved from receiving plants to the Class I needs of the distributing plants to which such milk is moved. The provisions of the order for determining classification of milk moved between approved plants are designed for application in cases in which the status of plants is already determined, and do not provide for assignment of milk by classes to individual plants of a group operated by the same handler. For the purpose of such special standards, it should be assumed that the milk received directly from producers will be distributed first and that reserve supplies will not be needed until such milk has largely been exhausted. Credit for milk shipped to a distributing plant should not be extended to the shipping plant until the requirements of the distributing plant for Class I milk exceed 85 percent of receipts of milk from producers at the distributing plant. Any Class I disposition in excess of this amount may be considered as reserve supply credit within which shipments from the supply plant may be considered to be closely associated with the Class I needs of the market.

The principal basis for inclusion in the pool should be that the supply plant ship more than half of its receipts for Class I needs during the period when the market supply of milk is seasonally low. While it is provided that a plant may qualify for inclusion in the pool in any month by shipment of more than 50 percent of its receipts as reserve supply credit, it is also provided that plants which so ship more than 50 percent of their receipts during four of the six months of August through January may retain their qualification upon application to the market administrator until such time as it is evident that the plant has failed to qualify in at least four of the same six months of the succeeding year. All plants whose receipts were pooled in May 1953 may likewise retain their status until such time as it is evident that they have failed to qualify by shipments in the coming August 1953 through January 1954 period.

Under the supply conditions of the North Texas market relative to Class I sales, it is concluded that an auxiliary plant supplying milk to other plants in the marketing area could be expected to market more than half of its receipts for Class I use during the months of August through January. The 50 percent requirement is established at a relatively low level, and the opportunity is provided to qualify for year-round participation in the pool by required shipments in any four of these six months, in order to allow for those situations in which rapidly changing supply conditions might temporarily reduce the need for supplemental milk for Class I use.

(2) No changes should be made in the territorial boundaries of the North Texas marketing area on the basis of this record.

Several proposals to expand the size

of the North Texas marketing area were included in the notice of hearing. The additional territory covered by the combined proposals is somewhat larger in size than the present marketing area. Some of the proposals were not sun-

ported by proponents at the hearing. These included a proposal to add Wichita Falls, a non-contiguous urban area located northwest of the present marketing area. Other proposals abandoned by the proponents were the proposals to add Bowie County adjoining the city of Texarkana which is not a part of the marketing area and to add Somervell and Hood Counties which touch the present marketing area near Fort Worth. Proponents offered no testimony directly in support of adding Rams County, a predominantly rural area.

Several counties to the south of the present marketing area and to the east of the area as well as Mineral Wells in Palo Pinto County which is located on the west boundary of the present marketing area were proposed to be included in the marketing area. The record indicates that handlers now regulated by the North Texas order sell milk in each of these proposed additions to the marketing area. In certain areas such as Mineral Wells and Corsicana County, all of the milk presently sold is regulated by the North Texas order. In other proposed additions to the territory regulated handlers sell varying percentages of the milk disposed of within those areas and the balance is disposed by handlers who are now not regulated by the North Texas order. The handlers who would be regulated by the order if the marketing area were extended to the south of the present territory generally favored inclusion of those territories and supported the extension of the marketing area in that direction. Several handlers who would be included by the extension of the regulation to counties lying east of the present marketing area objected to the extension of the marketing area in that direction.

The testimony in the record indicates that the prices paid by handlers who are now not regulated by the order are about the same as the prices paid by handlers under the North Texas order. The record indicates one instance in which a North Texas handler apparently lost certain Class I sales in the area proposed to be added. This was a military contract which was taken on a bid so low that handlers contend the milk must have been purchased at a lower cost. This one instance of the loss of

a military contract on the basis of a low bid by an unregulated handler is not convincing of a general situation which portends the likelihood that low price milk will be regularly available to compete with the regulated milk for outlets to military installations in this region. If such a situation does develop, it will be necessary to consider whether or not this particular military installation is dependent during most of the year on a supply from the North Texas market and therefore should be considered a part of the marketing area.

The declared purpose of milk marketing orders is to establish and maintain such orderly marketing conditions for agricultural commodities in inter-state commerce as will establish a specified level of prices to farmers. Since the evidence in this record gives no hint of disorderly marketing conditions which are likely to result if the marketing area is not extended to include these additional territories, we are unable to conclude that it is necessary to extend the marketing area to include these territories.

3. Changes in the provisions of the order with respect to the classification of milk should be adopted as set forth below.

A variety of proposals were made with respect to the classification of milk. The majority of these proposed that certain uses and dispositions of mill: which the order now classifies as Class I milk be classified as Class II milk,

A proposal that buttermilk be classified as Class II milk should not be adopted. The proponents of such a change contended that some health authorities of the marketing area do not require importation of solids for use in buttermilk to be in the form of milk or skim milk, but permit buttermilk to be reconstituted from milk solids imported in the form of Grade A condensed skim milk. The delivered cost of milk solids in Grade-A condensed skim milk is substantially more than that represented by the Class II price even though such cost is somewhat less than the Class I price. Furthermore, the physical characteristics of buttermilk and the market for it more closely resemble fluid milk than the products classified as Class II milk. The evidence does not establish that buttermilk is regularly made from Grade-A condensed milk when producer milk is available. Therefore, we cannot conclude from this record that the acceptance by local health authorities of Grade-A condensed for making buttermilk would be continued during a period in which fully-approved supplies of mill; are available.

Milk and skim milk disposed of in bulk during the months of March through August to bakeries or food product manufacturing plants which do not dispose of milk for fluid consumption should be classified as Class II milk. Cream disposed of to such outlets during any month should likewise be Class II milk. Bakeries and food product manufacturing plants are not required to use Grade A milk in their operations. Classification as Class II milk of milk and skim milk disposed of to such outlets is limited to the months of March through August when milk supplies are seasonally high.

Since the Class II price is established at a level which assumes a processing cost not incurred in the case of such fluid sales, a year-round Class II price for such uses would result in a cost per pound of milk solids for such uses lower than the cost of milk solids in the form of manufactured products. This cost advantage might encourage handlers to develop such sales even when the milk is needed for Class I products. Therefore, such uses should continue to be classified as Class I during the months September through February. restriction need not apply to dispositions in the form of cream, due to the high butterfat content of producer receipts in the market relative to Class I sales.

Skim milk dumped should continue to be regarded as milk not accounted for due to the fact that the dumped product disappears without an independent record available for verification. In the extensive North Texas marketing area. inspection by the market administrator of the physical process of dumping after prior notice of intention is not administratively practicable. In order to avoid so far as feasible Class I charges to handlers for skim milk for which they receive no return, the maximum allowance for shrinkage or unaccounted for skim milk should be increased from 2 to 5 percent of receipts for the months of April, May and June.

A proposal that skim milk in cream classified in Class II milk should be exempt from the allocation provisions of the order which determine the classification of milk received from producers should not be adopted. The order presently classifies the uses made of all receipts by each handler and allocates the skim milk and butterfat in such receipts separately in determining the classification at which producer milk is priced. There is no foundation in this record for establishing a system of accounting for milk whereby the use made of one component of milk would determine the classification of all components.

The area within which milk and skim milk may be classified as Class II milk when transferred or diverted to unapproved plants should be enlarged. Under provisions in effect at the time of the hearing, but since suspended, milk or skim milk transferred or diverted to an unapproved plant more than 200 miles distant was classified as Class I milk. Since the effective date of the order conditions affecting the disposal of milk in excess of Class I needs have changed in the North Texas market. Some milk manufacturing plants in or near the marketing area have ceased operations and a substantial number of producers from distant points in Arkansas and Missouri have entered the market as direct shippers. There are manufacturing plants in the area in which the farms of these producers are located to which their milk can economically be diverted, but which are beyond the 200 mile limit. It was proposed that the limit be placed at 250 miles (or 200

airline miles) from the nearest boundary of the marketing area, and that in addition certain specified countles be named in Arkansas and Missouri, plus one county in Texas. It is concluded that provision should be made so that milk or skim milk may be classified as Class II milk, upon proper verification of use in such class, if transferred or diverted to an unapproved plant located not more than 300 miles distant from Dallas or in certain named counties, 7 of which are in Missouri and one in Arkansas. Such an area will be approximately equal to that proposed, and will provide for all movements for manufacturing purposes for which need was shown on the record.

Changes should also be made in the provisions which determine the classification of cream transferred to unapproved plants. Presently cream transferred to such plants more than 200 miles distant is classified as Class I if it moves under Grade A certification of the appropriate health authority, and as Class II if it moves without such certification. Transfers to unapproved plants within 200 miles are Class I unless the receiver certifies that the cream is for Class II use, and maintains records subject to audit of the market administrator which verify such use. In practice these provisions make it less burdensome to establish Class II classification on movements to distant plants than on movements to nearby plants. There is little movement of cream under Grade A certification, as supplementary supplies of fluid milk plants in this re-gion are usually required in the form of milk or skim milk due to the comparatively greater shortage of nonfat solids than of butterfat. Cream which moves without Grade A certification is required to carry a label on each container indicating that it is an ungraded product. It appears reasonable to provide that the classification of cream to all unapproved plants be Class I if the cream moves under Grade A certification, and be Class II if the handler establishes that the cream moved without such certification and with each container labeled to indicate that the contents were an ungraded product suitable for manufacturing use only, and that the shipment was so invoiced.

The order should indicate specifically that shrinkage allocated to other source milk is a disposition of Class II milk. This will correct an inadvertent omission in the drafting of the present order but will in no way change its operation.

The classification of inventories should be changed for clarification of the order. Presently changes (plus or minus) in inventory from the beginning of the month to the end of the month are classified as Class II milk. This system does not indicate as clearly as is desirable the conditions under which a handler should pay reclassification charges because he has used in the current month for Class I purposes milk he accounted for to producers as Class II milk in inventory in a previous month. It does not permit the allocation provisions of the order to give producer milk in inventory prior claims to Class I sales over current receipts of

other source mill:. In addition the negative classification figures used cause some confusion. These results will be avoided if the entire closing inventory (milk, skim milk, cream and other products specified as Class I mill: when disposed of) is classified as Class II milk and the opening inventory is treated as a receipt to be allocated, in series beginning with Class II milk, to the uses remaining after prior allocation of receipts of other source milk to Class II The extent to which the opening inventory is allocated to Class I milk. when compared with the volume of producer mill: classified in the preceding month as Class II milk, will then provide the basis for any reclassification charge. This system of revolving inventories requires separate treatment of storage cream, stored in public warehouses and not removed within 30 days after storage. Such storage cream is normally stored in flush production seasons for manufacturing use in the short season. Provision is made for classification of such cream as Class II, subject of course to the reclassification provisions of the order if used for Class I milk when removed from storage.

4. No change should be made on the basis of the record of this hearing in the differentials added to basic formula prices in determining the Class I price; provisions for "supply-demand" adjustment of Class I prices should be retained in the order, but the rates of such adjustment should be varied seasonally. provision should not be included in the order to prevent the Class I butterfat differential from being less than that applicable to Class II milk; class prices and class butterfat differentials should be expressed in tenths of cents; a plant no longer in operation should be deleted from the list of condenseries whose paying prices constitute an alternative basic formula price.

Effective April 1, 1953, the North Texas order provides that, subject to a supply demand adjustment and certain features to prevent contraseasonal price movements, the price for Class I milk be determined by adding \$2.00 to a basic formula price during the months of April, May, and June, or \$2.20 during other months. Temporary price increases that were in effect since May 1, 1952, expired March 31 of this year. These temporary pricing provisions were included in the order because of the severe and extended drought in the North Texas supply area. For the months of May through September 1952 a "floor" price of \$6.63 was provided. For the months of October through February a temporary increase of 46 cents was provided in the Class I differential, and for March 1953 the temporary increase was 23 cents.

It was proposed that temporary increases be provided through March 1954. In support of this proposal it was contended that the effects of the drought were so devastating that even with adequate rainfall normal pasture and crop production conditions could not be anticipated before the spring season of 1954. Considerable testimony was introduced to show that perennial pasture and hay grasses and legumes had been dam-

aged to the extent that normal stands could not be expected in 1953.

While the evidence in the record may indicate the probability that feed production conditions may not be favorable in 1953 it does not form a basis for the conclusion that milk supplies for the North Texas market will be seriously impaired. Throughout the severe drought conditions that prevailed from the effective date of the order (October 1951) to the date of the hearing, the number of producers supplying the North Texas market has steadily increased. In October 1952, 3,020 producers were supplying the market, a gain of 570 from the 2,450 on the market in October 1951. In the same period daily receipts from producers had increased from 1.23 million pounds to almost 1:44 million pounds. It appears therefore that factors other than feed production conditions have had considerable effect on the supply of milk relative to the needs of the market. Since the supply of milk relative to sales appears to be increasing it is concluded that action to change the level of prices for this period should not be taken on the basis of this record.

The Class I price of the North Texas order is subject to an adjustment based on the relationship of receipts of milk from producers in the second and third preceding months to the total Class I sales of all handlers during these months. When the supply of producer milk in these months is less than a stated minimum percentage (varied seasonally) of Class I sales the Class I price is increased 2.5 cents for each percentage point of variation. Similarly a decrease of 2.5 cents is provided for each percentage point by which the supply of producer milk exceeds a stated maximum percentage (also varied seasonally) of Class I sales. The provision has been effective only since October 1, 1952. Prior to that date its effectiveness was either deferred under the terms of the order or was overriden by the "floor" prices established in the order.

It was proposed that the "supply-demand" adjustment be eliminated, or that the Class I sales used in the computation exclude those made out of the marketing area. It was also proposed that the rate of adjustment for each percentage point of variation be changed.

Had the supply-demand provision been operative at all times since the issuance of the order, it would have resulted in some increase in price each month prior to the time of the hearing. During the same period of time emergency conditions prevailed which required emergency price increases under the order, and handlers frequently paid substantially in excess of order prices. The provision was attacked on the basis that the different price changes resulting at different periods were not well related to each other. The fact that data for only thirteen months of operation under the order were available to the record makes comparison between different periods difficult.

Class I sales, whether in or out of the marketing area, represent an outlet for producer milk which should be included in the computation of any "supply-demand" adjustment. North Texas han-

dlers making out-of-market sales purchase milk to supply such sales. If outof-market sales were not included in the computation of the supply-demand adjustment, the price would be depressed unjustifiably as handlers acquired producer milk to supply such sales.

The rate of adjustment should be changed so that price increases will be at the rate of 2 cents per point in April, May and June, and 4 cents per point in September, October and November, and price decreases at 4 cents per point in April, May and June, and 2 cents per point in September. October and November. Indications that supplies for the fall months will be short or that supplies for spring months will be greater than normal, require greater changes in price than do indications that the reverse will be true. For all other months the rate of change, either up or down, should be 3 cents per point.

The seasonally variable schedule of supply-demand adjustments will also result in a slightly larger price adjustment for every percentage divergence of the utilization percentage from the normal limits. This should make the provision more effective in adjusting the price in line with the market supply and Class I sales.

A proposal that the Class I butterfat differential of the order never be less than the Class II butterfat differential should not be adopted. The Class I differential is determined from the butter price in the preceding month and the Class II differential from that in the current month. The factors used in computing the differentials are such that there is little likelihood that the Class II differential will ever exceed the Class I differential. The adoption of the Class II differential as a floor for the Class I differential would prevent determination of the Class I differential in advance of the month to which it applies. Advance announcement of the Class I price and butterfat differential is now provided by the order and this record provides no basis for a change in this respect.

Class prices and class butterfat differentials (to handlers) should be expressed to the nearest one-tenth cent. This will make definite in the order the practice of the market which appears to have been satisfactory.

The plant of the Carnation Company, Jefferson, Wisconsin, is no longer in operation. Accordingly, the name of this plant should be deleted from the list of condenseries whose average paying price constitutes an alternative basic formula price.

5. A proposal to include differentials in the order which would establish Class I prices to handlers according to the location of the plant at which such milk is received from producers, and which would determine the uniform prices to producers applicable at the location of plants at which milk is received, including plants to which milk is diverted directly from farms, should not be adopted on the basis of this record because the record does not provide an adequate basis upon which to determine the area within which such differentials should

apply or the rates at which they should be computed.

The North Texas order now contains no provisions for differentials applicable to the Class I or uniform prices of the order based upon the location at which milk is received from producers. Most of the approved plants at which milk is received from producers for the North Texas market are located in the 16 county marketing area. Two plants are located in Mineral Wells, adjacent to the western boundary of the area. Another plant outside the marketing area is a receiving station located at Windthorst, Texas, approximately 50 miles from the boundary of the marketing area.

There has, however, been a rapid increase in the number of distant producers supplying the North Texas market. In November 1951 about 60 producers whose farms are located in Northwestern Arkansas began supplying the market as direct shippers. Their milk is first collected at Springdale, Arkansas, and is delivered in the producer's cans to the plant of a handler in Dallas. Springdale is approximately 275 road miles from the boundary of the marketing area and more than 350 road miles from Dallas. In August 1952 there were approximately 100 producers for the Dallas market whose milk was collected at Springdale. Representatives of these producers testified that for about four months in the spring and summer of 1952 their milk was not delivered to Dallas but was diverted to manufacturing plants in that general

Another group of approximately 100 producers entered the market in the summer of 1952. The milk of thesa producers is collected at Monnett, Missouri, approximately 340 road miles from the boundary of the marketing area and more than 400 road miles from the Dallas plant at which their milk is received when needed in the market. The cooperative association to which these producers belong operates a manufacturing plant at Monnett to which the milk is diverted when not needed in the market.

The Arkansas producers paid a hauling charge of \$1.00 per hundredweight to get their milk from their farms to Dallas, and 60 or 65 cents when the milk was diverted to a manufacturing plant. Hauling costs for the Missouri-producers were not shown on the record.

Direct delivery of milk in producers' cans from such distances is a new development in milk procurement. Milk supplies from such distances have normally been accumulated at plants in the production area. The present provisions of the North Texas order would, however, require the handler operating an approved plant in the Arkansas or Missouri area to pay the Class I price of the North Texas order for milk received at such a plant and to bear the costs of movement to the North Texas market. Producers would also receive for delivery of their milk to such a plant the same uniform price as would producers who delivered their milk to a plant located in Dallas or Fort Worth. Such a condition might be very attractive to producers but not to the handler.

The attractiveness of the market to a producer is determined by the net return he gets from the market price less the cost of moving his milk to the market. The record indicates that under the present provisions of the order certain producers receive a higher net farm price when their milk is diverted to nearby manufacturing plants than they would receive if the milk were moved to the market for Class I sales. Although producers, except those who belong to cooperative associations which operate milk plants, are not in position to direct the use of their milk, the more attractive net price which handlers can offer producers when their milk is diverted for manufacturing would tend to encourage such diversions. The pricing plan is designed to direct milk to the Class I market as it is needed, but under the present provisions there is a contraeffect in some cases.

The recommended decision in these proceedings concluded that a system of location differentials should be adopted which would apply to Class I prices for milk received at approved plants and to uniform prices to producers for milk received at such plants or diverted to unapproved plants, but that the record fails to provide an adequate basis for determining the area within which such differentials should apply or the rates at which they should be computed. It was further recommended that further action on this issue should be deferred until the hearing could be reopened for the purpose of receiving further specific evidence with respect to the area to which location adjustments should apply and the rates that should apply at various locations. The exceptions received to the recommended decision indicate that little further evidence would be available if the hearing were to be reopened at this time. In view of such exceptions it is concluded that this record should be closed without further action on this issue, so that in any future consideration of the problem all aspects may be open for consideration.

The order presently provides that a handler shall pay the minimum class prices of the order for milk received at his plants from producers. A proposal was made that this requirement be restricted to milk received at a "processing plant" which term apparently referred to bottling plants with route distribution m the marketing area. The record shows that in addition to such plants there are presently approved receiving plants at Windthorst, Texas, and McKinney, Texas, which do not have bottling facilities or route distribution in the area. Such plants are presently defined as approved plants, and elsewhere in this decision provision is made to continue to define as an approved plant a receiving plant which meets certain qualifications. The proposal would appear to be an attempt to leave unpriced producer milk received at plants now and hereafter to be specifically defined in the order as approved plants. The order, however, specifically provides producers shall be paid the uniform price of the order for all milk received at approved plants, and there was no proposal for changing this

provision. would result in relieving a handler of any obligation to pay class prices for milk for which producers are required to receive the uniform prices. Since the pool reimburses a handler for any amount by which the amount to be paid producers at the uniform price exceeds his obligation at class prices, producers as a whole would, through a reduced uniform price, be furnishing milk without cost to such a handler. The proposal should be denied. In order that the requirements as to the points at which the class prices and the uniform prices of the order apply cannot possibly be misunderstood, it is provided that the class prices and uniform prices apply to milk received at approved plants, and that milk diverted for the account of a handler shall be regarded to have been received by the handler at an approved plant at the location of the unapproved

6. The butterfat differential applicable to prices paid to producers should be expressed in even cents and decreased slightly. Under present provisions of the order this butterfat differential is 1.2 times the price of butter at Chicago, and is rounded to the nearest one-tenth cent. A cooperative representing a majority of producers in the market asked that the differential be expressed in even cents and proposed that this be accomplished by providing a one-cent change in the differential for each 10 cent change in the price of butter. The proposed change would not affect prices charged handlers and there was no opposition to its adoption. It will provide a slight reduction in the differential at the present level of butter prices, which appears desirable since the butterfat test of milk received from producers exceeds the average test of Class I sales.

7. No change should be made in the order on the basis of this record to require payments to the producer fund by handlers who purchase milk and dairy products for Class I use from sources other than producers.

Producers are defined generally in the order to include all of the dairy farmers whose milk is purchased regularly by North Texas handlers for disposition in the marketing area under the full approval of the local health departments. All other receipts are regarded as other source milk.

Presently handlers are free to use other source milk for Class I sales in excess of their receipts of producer milk: without further obligation to producers. It was proposed at this hearing that handlers be required to make a payment into the producer fund equal to the difference between the Class I and Class II prices on each hundredweight of other source milk allocated to Class I use either (1) when producer milk was available to the handler or (2) when the handler failed to establish that such use of other source milk was not in violation of applicable health regulations. This record fails to show a reasonable basis for computing a compensatory payment or determining the circumstances when such payment should be required on the basis that producer milk was available to the handler. While the record is

Adoption of the proposal more definite concerning a basis for it in relieving a handler of computing compensation payments if the top ay class prices for ungraded mill: is used, no immediate ich producers are required to need for such a provision was shown.

8. The order should specify that the advance payments to producers with respect to milk delivered during the first 15 days of each month be computed at a price no less than the Class II price without adjustment for butterfat test or deduction for hauling.

Several proposals were made with respect to advance payments. The testimony with respect to all of these related to conditions under which handlers had for competitive reasons paid producers more frequently or at higher rates than the order required. The order can establish only minimum rates of payment. Since this is an advance payment, and final accounting is made later, it is desirable that the determination of whether the minimum advance to each producer has been made be as simple as possible. The Class II price is substantially below the average price paid producers so that there is little likelihood of overpayment if the minimum is established at the Class II price without adjustment for test or deduction for hauling. It is concluded that this minimum should be specified, but in order to avoid any possibility of requiring overpayments that a handler cannot recover, the advance payment should not be required if the producer has ceased deliveries to the handler by the 25th of the month.

9. No changes should be made in the order on the basis of this record with respect to the months in which payments to producers are made on bases or with regard to the transfer of bases. The orders should be clarified with respect to the computation of bases for producers whose deliveries are not made daily during the base-forming period.

The order presently provides that payments to producers for milk delivered during the months of April, May and June be made at base and excess prices and that for other months a blend price be computed for all milk without regard to bases established by individual producers. It was proposed that July and August be added to the months for which bases would be effective. Under the present provisions producers without established bases may enter the market during the months of July through October and have their prices computed on the same uniform price as producers without established bases. This is the period of the year when the market has heretofore been seeking additional producers to supply short season deficits. The proposal would restrict this period to September and October when such deficits have frequently been acute. This record does not support such a change.

The order provides that the base established by a producer can be transferred only to a member of the producer's immediate family in the event of death, ratirement, or entry into military service, or to one of the joint holders of a base when a joint holding is terminated. It was proposed that a producer be permitted to transfer his entire base freely without limitation other than that there be no transfers of partial bases. The

purpose of a base-rating plan of payment is to distribute the flush season payments to individual producers in accordance with their individual deliveries during the short production season. The free transfer of bases might encourage trading in bases and affect the value of baseaccompanied herds as compared to no base herds. Such is not the purpose of a base payment plan.

The order provides for the establishment of daily bases at the average of a producer's daily deliveries during the months of October through January by dividing the total pounds of milk received from such producer by the number of days, not to be less than ninety, that the producer delivers milk in the period. The milk of some producers is accepted when delivered every other day. If the number of days of delivery is used in the computation of the bases of such producers, their bases would be greater than their daily production during the base-forming period. The order should be clarified to specify that the number of days to be used be that during the period within which the producer made deliveries in the named months.

10. The market administrator should be authorized to announce the name of any handler who has failed to make required reports or payments without waiting until 10 days have elapsed. The order authorizes the announcement of the names of those who have not reported or paid within 10 days of the required date. The 10-day delay in announcingnon-compliance prevents the market administrator from disclosing at the announcement of the uniform price any handlers whose receipts and uses were not included in the computation because their reports were not filed in accordance with the order. It is important that other handlers and producers be advised when the uniform price is announced whether the price is determined on the basis of reports received from all regulated handlers.

Other non-substantive changes which are needed to clarify the language of the order and the amendments decided upon at this time should be adopted and are incorporated in the proposed amendatory provisions hereinafter set forth.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will-tend to effectuate the declared policy of the act;

(b) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for such milk, and the minimum prices specified in the proposed marketing agreement and in the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed marketing agreement and the order, as amended and as hereby proposed to be further amended, will regulate the handling of milk in the

same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in, the said marketing agreement upon which a hearing has been held.

Ruling on exceptions. Within the period reserved therefore, exceptions were filed to certain of the findings, conclusions and actions recommended by the Assistant Administrator. In arriving at the findings and conclusions included in this decision each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions herein are at variance with the exceptions, such exceptions are overruled.

Determination of representative period. The month of June 1953 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order amending the order, as amended, regulating the handling of milk in the North Texas marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such order, as amended.

Marketing agreement and order Annexed hereto and made a part hereof are two documents entitled "Marketing Agreement Regulating the Handling of Milk in the North Texas Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the North Texas Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the Federal Register. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order which will be published with this deci-

This 'decision filed at Washington. D. C., this 10th day of July 1953.

[SEAL] J. EARL COKE. Acting Secretary of Agriculture.

Order Amending the Order, as Amended, Regulating the Handling of Milk in the North Texas Marketing Area

§ 943.0 Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with

the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) Findings upon the basis of the hearing record. Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the North Texas marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act:

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supplies of and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest: and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

Order relative to handling, therefore ordered that on and after the effective date hereof the handling of milk in the North Texas marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order as amended, and as hereby further amended, and the aforesaid order is hereby further amended as follows:

1. Delete § 943.7 and substitute there-

§ 943.7 Approved plant. "Approved

plant" means: (a) A milk plant approved by any health authority having jurisdiction in

the marketing area for the processing or packaging of Grade A milk or milk products and from which such milk or milk products are disposed of on route(s) in the marketing area; or

(b) A milk plant approved by and under the routine inspection of the appropriate health authority of the city of Dallas or of the city of Fort Worth. at which milk from dairy farmers inspected and approved by such authority is weighed and commingled; and

This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

- (1) 50 percent or more of the receipts of such milk during the month is moved from such plant as milk or skim milk in bulk to plant(s) specified in paragraph (a) of this section and assigned as reserve supply credit pursuant to § 943.17; or
- (2) (i) Such plant has qualified as an approved plant pursuant to subparagraph (1) of this paragraph during four months of the current or immediately preceding period of August through January, or in lieu thereof with respect to qualification through January 1954, such plant was an approved plant pursuant to this order during the month of May 1953, (ii) written application for continuing status as an approved plant has been filed with the market administrator, and (iii) disposition of milk from such plant has been such that it is still possible for such plant to qualify as an approved plant pursuant to subparagraph (1) of this paragraph during four of the months within the period of August through January next following the period of qualification described in subdivision (i) of this subparagraph.
- 2. Delete § 943.10 and substitute therefor:
- "Producer" §943.10 Producer means any person, other than a producer-handler, who produces milk approved by the applicable health authorities having jurisdiction within the marketing area_for consumption as Grade A milk, which milk is received directly from the farm at an approved plant. "Producer" shall not include any such person during periods of temporary degrading by such health authority if such health authority notifies the operator of the approved plant or the market administrator in writing of the effective date or dates of such action and subsequent reapproval. "Producer" shall include any such person whose milk is caused to be diverted by a handler to an unapproved plant for the account of such handler, and milk so diverted shall be regarded for all purposes of this order to have been received by such handler at an approved plant at the location of such unapproved plant and then transferred to the unapproved plant. "Producer," shall not include any such person with respect to milk produced by him which is received at a plant operated by a handler who is subject to another Federal marketing order and who is partially exempt from this subpart pursuant to § 943.61.
- 3. Insert two new sections following § 943.15, as follows:
- § 943.16 Route. "Route" means any delivery (including any delivery by a vendor or disposition at a plant store) of milk, skim milk, buttermilk, flavored milk drinks or cream other than a delivery in bulk form to a milk processing plant.
- § 943.17 Reserve supply credit. The hundredweight of reserve supply credit that may be assigned to milk moved to a plant described in § 943.7 (a) shall be calculated as follows: From the total hundredweight of milk disposed of as Class I milk from the transferee plant

- during the month deduct Class I sales to other handlers and from this result deduct an amount equal to 85 percent of the total hundredweight of milk received from producers during the month at such plant. Any plus figure resulting from this calculation shall be assigned pro rata to milk moved to such plant from plants described in § 943.7 (b) unless the operator of the transferce-plant notifies the market administrator in writing of a different assignment on or before the 7th day after the end of the month.
- 4. In § 943.22 (h), delete the words "within 10 days"
- 5. Delete § 943.41 and substitute therefor:
- § 943.41 Classes of utilization. Subject to the conditions set forth in §§ 943.43 and 943.44, the classes of utilization shall be as follows:
- (a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat:
- (1) Disposed of in the form of milk, skim milk, buttermilk, flavored milk drinks, cream, cultured sour cream, any mixture (except eggnoz and bulk ice cream and frozen dairy product mixes) of cream and.milk or skim milk;
- (2) Used to produce concentrated (including frozen) milk, flavored milk or flavored milk drinks disposed of for fluid consumption neither sterilized nor in hermetically sealed cans; and
- (3) All other skim milk and butterfat not specifically accounted for as Class II milk;
- (b) Class II milk shall be all skim milk and butterfat:
- (1) Used to produce any product other than those specified in paragraph (a) of this section:
 - Disposed of for livestock feed;
- (3) Disposed of in bulk, during the months of March through August, or as bulk cream during any month, to commercial bakeries or food products manufacturing plans (other than dairy plants) which do not dispose of milk for fluid consumption;
- (4) In frozen cream stored in a public cold storage warehouse and not removed within 30 days after date of storage;
- (5) In shrinkage up to 2 percent (5 percent, with respect to receipts of skim milk during the months of April, May and June) of skim milk and butterfat in receipts from producers;
- (6) In shrinkage of other source milk;
- (7) In inventory at the end of the month in the forms specified in paragraph (a) (1) and (2) of this section.
- 6. Delete § 943.43 (b) and substitute therefor:
- (b) Any skim milk or butterfat classified as Class II milk shall be reclassified if such skim milk or butterfat is later disposed of by such handler or by another handler (whether in original or other form) as Class I milk. Any skim milk or butterfat which was classified as Class II in the previous month pursuant to § 943.41 (b) (7) shall be reclassified as Class I if it is subtracted in the current month from Class I pursuant to § 943.46 (a) (5).

- 7. Delete paragraphs (c) (d) and (e) of § 943.44 and substitute therefor:
- (c) As Class I milk, if transferred or diverted in the form of milk or skim milk to an unapproved plant located (1) more than 300 miles from Dallas, Texas, by shortest highway distance as determined by the market administrator and (2) outside the counties of Barry, Cedar, Greene, Lawrence, Polk, Newton and McDonald in the State of Missouri, and Benton in the State of Arkansas;
- (d) As Class I milk if transferred in the form of cream under Grade A certification to an unapproved plant, or unless the handler claims classification as Class II milk and establishes the fact that such cream was transferred without Grade A certification and with each container labeled or tagged to indicate that the contents are an ungraded product suitable for manufacturing use only, and that the shipment was so involced:
- (e) As Class I milk if transferred or diverted in the form of milk or skim milk to an unapproved plant not described in paragraph (c) of this section, unless the conditions in subparagraphs (1) and (2) of this paragraph are met:
- (1) The handler claims classification as Class II milk on the basis of utilization mutually indicated in writing to the market administrator by the handler and the operator of the unapproved plant on or before the 7th day after the end of the month within which such transfer occurred; and
- (2) The operator of the unapproved plant maintains books and records showing the receipts and utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification:
- (3) If the conditions in subparagraphs (1) and (2) of this paragraph are met, the classification reported by the handler shall be subject to verification by the market administrator as follows:
- (i) Determine the use of all skim milk and butterfat at such unapproved plant, and
- (ii) Allocate the skim milk and butterfat so transferred or diverted to the highest use classification remaining after subtracting, in saries beginning with Class I milk, the skim milk and butterfat in milk received at the unapproved plant direct from dairy farmers who the marlet administrator determines constitute the regular source of supply for fluid usage of such unapproved plant in markets supplied by it.
- (iii) The classification of milk transferred or diverted to an unapproved plant from which all receipts are moved in bulk to a second unapproved plant for further processing shall be determined on the basis of utilization in such second plant.
- 8. In § 943.46 delete paragraph (a) (4) and substitute therefor:
- (4) Subtract from the remaining pounds of slidm milk in each class, in series beginning with Class II, the pounds of slidm milk in receipts of other source milk:

- 9. In § 943.46 (a) renumber subparagraphs (5) (6) and (7) as subparagraphs (6) (7) and (8) respectively, and insert a new subparagraph (5) as follows:
- (5) Subtract from the remaining pounds of skim milk in each class, in series, beginning with Class II, the pounds of skim milk in inventory at the beginning of the month in the form of milk, skim milk, cream or any product specified in § 943.41 (a) (1) or (2)
- 10. In § 943.50 (a) delete from the list of plants and places the following: "Carnation Company, Jefferson, Wisconsin."
- 11. Delete § 943.51 and substitute therefor
- § 943.51 Class prices. Subject to the provisions of § 943.52, the minimum prices per hundredweight to be paid by each handler for milk received at his approved plant from producers during the month shall be as follows:
- (a) Class I milk. The basic formula price (rounded to the nearest one-tenth cent) for the preceding month, plus \$2.00 for each of the months of April, May and June, and plus \$2.20 for all other months, subject to the following:
- (1) A supply-demand adjustment of not more than 50 cents computed as follows:
- (i) For the second and third months preceding the month to which the price applies determine the total pounds of Class I milk (less interhandler transfers) for all handlers exclusive of producerhandlers and handlers partially exempt from this order pursuant to § 943.61,
- (ii) For the same months determine the total pounds of milk received from producers by the same handlers;
- (iii) Divide the results obtained in subdivision (ii) of this subparagraph by the result obtained in subdivision (i) of this subparagraph to obtain a "net utilization percentage," rounded to the nearest whole percent;
- (iv) For each percentage point that the "net utilization percentage" is less than the minimum percentage listed below for such two-month period the Class I price-shall be increased 2 cents in April, May and June, 3 cents in July, August, December, January, February and March, and 4 cents in September, October, and November; for each per-centage point that the "net utilization percentage" is more than the maximum percentage listed below for such twomonth period the Class I price shall be decreased 4 cents in April, May and June, 3 cents in July, August, December, January, February and March; and 2 cents in September, October and November:

	Perce	ntages	Month to which ad- justment applies		
2-month period	Mini- mum	Maxi- mum			
January-February February-March March-April April-May May-June July-August July-August August-September September-October November November-December December-January	108 112 115 120 125 120 116 107 100 102	118 122 125 130 135 130 125 117 110 110 112	April. May. June. July. August. September. October. November. December. January. February. March.		

- (2) Except for adjustments pursuant to subparagraph (1) of this paragraph, such price for each of the months of October, November and December shall not be less than that for the preceding month, and such price for each of the months of April, May and June shall not be more than that for the preceding month.
- (b) Class II milk. The price computed pursuant to § 943.50 (c) for the months of April, May and June, and the higher of the prices computed pursuant to § 943.50 (b) or (c) for all other months, rounded in each case to the nearest one-tenth cent.
- 12. In § 943.52, delete the last phrase preceding paragraph (a) which reads "and dividing the result by 10." and substitute therefor: " dividing the result by 10 and rounding to the nearest one-tenth cent."
- 13. Delete § 943.70 and substitute therefor
- § 943.70 Computation of value of milk. The value of milk received during each month by each handler from producers shall be a sum of money computed by the market administrator as follows:
- (a) Multiply the pounds of such milk in each class by the applicable respective class prices and add together the resulting amounts;
- (b) Add an amount computed by multiplying the pounds of overage deducted from each class pursuant to § 943.46 (a) (8) by the applicable class price(s) and
- (c) Add any charges computed as follows:
- (1) For any skim milk or butterfat in inventory reclassified pursuant to § 943.43 (b) which'is not in excess of the quantity in producer milk classified as Class II milk (other than as shrinkage) in the handler's plant(s) for the preceding month, a charge shall be computed at the difference between its value at the Class I price for the current month and its value at the Class II price of the preceding month;
- (2) For any other skim milk or butterfat reclassified pursuant to § 943.43 (b) a charge shall be computed at the difference between its value at the Class I price for the current month and its value at the Class II price for the month in which previously classified as Class II milk
- 14. Delete § 943.90 (b) and substitute therefor:
- (b) On or before the 25th day of each month, to each producer (1) for whom payment is not made pursuant to paragraph (c) of this section and (2) who has not discontinued delivery of milk to such handler, an advance payment for milk received from such producer during the first 15 days of such month computed at not less than the Class II price for 4 percent milk of the preceding month, without deduction for hauling.
- 15. Delete § 943.91 and substitute therefor:
- § 943.91 Producer butterfat differential. In making payments pursuant to § 943.90 (a) or (c) there shall be added to, or subtracted from the uniform price for each one-tenth of one percent that the average butterfat content of the milk

received from the producer is above or below 4.0 percent, an amount determined from the simple average, as computed by the market administrator, of the daily wholesale selling prices per pound (using the mid-point of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago, as reported by the Department during the month, according to the following table:

		CI JUL
	differ	ential
Butter price:	(ce:	nts)
20.0 to 29.99	cents	· 8
30.0 to 39.99	cents	
40.0 to 49.99	cents	5
50.0 to 59.99	cents	
60.0 to 69.99	cents	7
70.0 to 79.99	cents	8
80.0 to 89.99	cents	Ð
90.0 to 99.99	cents	10
\$1.00 to \$1.10	0	11

- 16. Delete § 943.80 (a) and substitute therefore the following:
- (a) Divide the total pounds of milk received by a handler(s) from such producer during the months of October through January immediately preceding by the number of days, not to be less than 90, during the period(s) within which such producer made deliveries of milk in such months.
- [F. R. Doc. 53-6263; Filed, July 15, 1953; 8:49 a. m.]

DEPARTMENT OF LABOR

Wage and Hour Division [29 CFR Part 550 1

DEFINING AND DELIMITING THE TERM "TALENT FEE"

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that, pursuant to authority granted under section 7 (d) (3) (c) of the Fair Labor Standards Act, as amended (52 Stat. 1060; 29 U. S. C. 201) the Administrator, for the purpose of clarification, proposes to amend the regulations contained in this part as follows:

1. Amend Part 550 by adding a proviso at the end of § 550.1 to read: "Provided, however, That where services described in paragraph (a) of this section are performed on a program falling outside of the regular workday or workweek as established and scheduled in good faith in accordance with the provisions of the applicable employment agreement, the Administrator will not regard the act as requiring additional compensation as a result of the time worked on the program if the parties agree in advance of such program that a special payment made therefor shall include any increased statutory com-pensation attributable to the additional worktime thereon and if such special payment, when made, is actually sufflcient in amount to include the statutory straight-time and overtime compensa-tion (computed without regard to talent fees) for the additional time worked in the workweek resulting from the performer's service on such program."

Interested persons may, within 15 days from the date of publication of this notice in the FEDERAL REGISTER, submit, in writing, to the Administrator, Wage and Hour and Public Contracts Divisions,

U. S. Department of Labor, 14th Street and Constitution Avenue NW., Washington 25, D. C., their views and comments relative to the proposed amendment.

Signed in Washington, D. C., this 10th day of July 1953.

WM. R. McComb, Administrator, Wage and Hour Division.

FEDERAL TRADE COMMISSION

I 16 CFR Part 300 1

TFile No. 204-57

Rules and Regulations Under Wool Products Labeling Act of 1939

NOTICE OF PROPOSED RULE MAKING

1. The Federal Trade Commission hereby gives notice of proposed rule making in the matter of amending Rule 28 of the Rules and Regulations (16 CFR 300.28) under the Wool Products Labeling Act of 1939.

It is proposed that § 300.28 (Rule 28) be amended as follows:

a. By adding the following as paragraph (a) thereof:

(a) Products containing synthetic fibers produced from textile by-products. Where a wool product is composed in part of various synthetic fibers produced from textile by-products containing undetermined quantities of such fibers, the percentage content of the respective fibers from such textile by-products may be disclosed on the required stamp, tag or label in aggregate form as "synthetic fibers" followed by the naming of such fibers in the order of their predominance by weight, as for example:

60% wool. 40% synthetic fibers: Rayon. Acetate. Nylon.

b. By setting forth the title and text of present § 300.28 as paragraph (b) of the amended section.

c. By substituting for the title of present § 300.23, the following title: § 300.28 Undetermined quantities of synthetic and miscellaneous reused fibers.

2. Such action is taken pursuant to authority provided in section 6 (a) of the Wool Products Labeling Act of 1939 (54 Stat. 1151, 15 U.S. C. A. section 68d)

3. Interested parties may participate by submitting to the Federal Trade Commission at its offices in Washington, D. C., on or before the 17th day of August 1953, in writing and in duplicate, their views, arguments or other data, either in support of or against the proposed rule, or the form thereof. The Commission will consider all views, arguments and data submitted before taking final action with respect to the proposed rule.

Issued: July 9, 1953.

By direction of the Commission.

[SEAL] WM. P. GLENDENING, Jr.,
Acting Secretary.

NOTICES

DEPARTMENT OF THE TREASURY

Bureau of Customs

[495.22]

LEATHER-COVERED BRIER PIPES

PROSPECTIVE TARIFF CLASSIFICATION

JULY 10, 1953.

It appears probable that a correct interpretation of paragraph 1552, Tariff Act of 1930, requires that tobacco pipes and pipe bowls of brief, covered with and in chief value of leather, be classified thereunder as "pipes, pipe bowls * * * not specially provided for, * * * of whatever material composed," and not as "tobacco pipe bowls, wholly or in chief value of brier or other wood or root, * * * and tobacco pipes having such bowls," at a rate of duty, in some instances, higher than that currently assessed under an established and uniform practice.

Pursuant to § 16.10a (d) Customs Regulations of 1943 (19 CFR 16.10a (d)) notice is hereby given that the existing practice of classifying such merchandise is under review in the Bureau of Customs.

Consideration will be given to any relevant data, views, or arguments pertaining to the correct tariff classification of such pipes, which are submitted in writing to the Bureau of Customs, Washington 25, D. C. To assure consideration, such communications must be received in the Bureau not later than 30 days from the date of this publication. No hearings will be held.

[SEAL] D. B. STRUBINGER,
Acting Commissioner of Customs.

FEDERAL POWER COMMISSION

[Docket Nos. G-1142, G-1508, G-2019, G-2074, G-2210]

UNITED GAS PIPE LINE CO.

ORDER SUSPENDING PROPOSED RATE SCHED-ULES, PERMITTING PROPOSED RATE SCHED-ULES TO BECOME EFFECTIVE ON THIRTY DAYS' NOTICE PENDING HEARING, CONSOL-IDATING PROCEEDINGS, AND FIXING DATE OF HEARING

On June 24, 1953, United Gas Pipe Line Company (United) tendered for filing its First Revised Sheets Nos. 1, 4, 5, 6, 7, 16, 32, 40, 118, 119, and 120, and Second Revised Sheets Nos. 23, 31 and 39 to its FPC Gas Tariff, Original Volume No. 1, containing increased rates and charges for certain town-border sales, proposed to be made effective as of July 15, 1953.

The increased rates and charges would result in an estimated increase of \$1,691,-000 per year based on actual sales for the calendar year 1952, or \$1,778,000 based on estimated sales for the year 1953, in the rates and charges presently on file with the Commission in United's tariff.

From the data filed by United the increased rates and charges provided in said proposed First Revised Sheets Nos. 1, 4, 5; 6, 7, 16, 32, 40, 118, 119, and 120, Second Revised Sheets Nos. 23, 31 and 39 as tendered for filing on June 24, 1953, have not been shown to be justifled and may be unjust or unreasonable or otherwise unlawful. By reason of the proviso of section 4 (e) of the Natural Gas Act, however, the proposed increase in rates reflected in First Revised Sheets Nos. 32 and 40 and Second Revised Sheets Nos. 31 and 39, are subject to investigation in these proceedings and such revision as may be appropriate after hearing, but are not subject to suspension. Since good cause has not been shown by United for the requested effective date of July 15, 1953, as required by section 4 (d), First Revised Sheets Nos. 32 and 40 and Second Revised Sheets Nos. 31 and 39 can only be permitted to become effective on July 25,

[&]quot;Provided, That the Commission shall not have authority to suspend the rate, charge, classification or service for the sale of natural gas for resale for industrial use

1953, i. e., upon thirty days' notice as provided in section 4 (d)

The rates and charges proposed to be increased by United are among the rates and charges which are the subject of the consolidated proceedings in In the matters of United Gas Pipe Line Company, Dockets Nos. G-1142, G-1508, G-2019, and G-2074. These proceedings are in recess until July 20, 1953, at which time United is to complete its case-inchief in those proceedings.

The proposed increase in rates and charges raises issues respecting rate of return, rate base including working capital, cost of service, allocation, appropriate test year, jurisdiction, and discrimination, among others, which are also involved in Dockets Nos. G-1142, G-1508, G-2019, and G-2074.

It appears appropriate and desirable to consolidate the proposed application filed on June 24, 1953, for an increase in rates with the proceedings in the consolidated Dockets Nos. G-1142, G-1508, G-2019, and G-2074 so that the common issues raised by these various proceedings may be heard together.

By letter of June 26, 1953, customers of United and interested State commissions were invited to make comments in regard to the rate increase application filed June 24, 1953. Comments were received from the Alabama Public Service Commission, the cities of Tyler. Texas, and Bastrop, Louisiana, and six customers. Generally, objections were made to the proposed rate increase. No comment was received from United Gas Corporation which is the principal townborder customer and the parent company of United.

The Commission finds:

- (1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act and good cause exists for the Commission to enter upon a hearing on July 20, 1953, pursuant to the authority contained in section 4 of such act, concerning the lawfulness of United's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended by First Revised Sheets Nos. 1, 4, 5, 6, 7, 16, 32, 40, 118, 119, and 120, and Second Revised Sheets Nos. 23, 31 and 39, and that said proposed sheets, with the exception of First Revised Sheets Nos. 32 and 40 and Second Revised Sheets Nos. 31 and 39, be suspended as hereinafter provided and the use thereof deferred pending hearing and decision thereon.
- (2) Good cause has not been shown for waiver of the 30 days' notice requirement of section 4 (d) of the Natural Gas Act with respect to First Revised Sheets Nos. 32 and 40 and Second Revised Sheets Nos. 31 and 39.
- (3) Good cause exists for further consolidating the proceeding involving the proposed increased rates and charges contained in the proposed First Revised Sheets Nos. 1, 4, 5, 6, 7, 16, 32, 40, 118, 119, and 120, and Second Revised Sheets Nos. 23, 31 and 39 with the proceedings in consoldidated Dockets Nos. G-1142, G-1508, G-2019, and G-2074
- (4) Good cause exists for fixing the date of hearing less than fifteen days after publication of this order in the FEDERAL REGISTER.

(5) It is necessary and appropriate to carry out the provisions of the Natural Gas Act, and it is in the pulic interest that the procedure hereinafter prescribed shall be followed at the hearing in order to conduct these proceedings with reasonable dispatch.

The Commission orders:

(A) A public hearing be held at 10:00 a. m., e. d. s. t., on July 20, 1953, in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the lawfulness of the rates, charges, classifications, and service, subject to the jurisdiction of the Commission, as set forth in United's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended by the revised sheets described in paragraph (B) hereof.

(B) The proceeding in Docket No. G-2210, involving United's First Revised Sheets Nos. 1, 4, 5, 6, 7, 16, 32, 40, 118, 119, and 120, and Second Revised Sheets Nos. 23, 31 and 39, and the proceedings in Dockets Nos. G-1142, G-1508, G-2019, and G-2074 be and they hereby are consolidated for purpose of hearing.

(C) Pending such hearing and decision thereon, United First Revised Sheets Nos. 1, 4, 5, 6, 7, 16, 118, 119, and 120, and Second Revised Sheet No. 23, to its FPC Gas Tariff, Original Volume No. 1, be and the same are hereby suspended and the use thereof deferred until December 25, 1953, unless otherwise ordered by the Commission, and until such further time thereafter as said proposed revised sheets may be made effective in the manner prescribed by the Natural Gas Act.

(D) Pending such hearing and decision thereon First Revised Sheets Nos. 32 and 40 and Second Revised Sheets Nos. 31 and 39 be and the same are hereby permitted to become effective on July 25,

(E) At the hearing United shall go forward first and shall present and complete its case-in-chief with respect to its FPC Gas Tariff, as amended by the revised sheets set forth in paragraph (B) above, before cross-examination is undertaken of United's presentations in the consolidated proceedings.

(F) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: July 10, 1953. Issued: July 10, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY. Secretaru.

[F. R. Doc. 53-6258; Filed, July 15, 1953; MAVIGATION WITHIN AIRSPACE RESERVATION 8:47 a. m.]

[Docket No. G-2172]

EAST TENNESSEE NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

On May 19, 1953, East Tennessee Natural Gas Company (Applicant) a Tennessee corporation with its principal office near Knoxville, Tennessee, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, author-

izing the construction and operation of certain natural-gas transmission facilities, subject to the jurisdiction of the Commission, as described in the application on file with the Commission and open to public inspection.

The Commission finds:

(1) This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for noncontested proceedings, and no protest or petition in opposition to said application having been filed subsequent to the giving of due notice of the filing of the application, including publication in the Federal Register on June 6, 1953 (18 F. R. 3268)

(2) It is reasonable and in the public interest and good cause exists for fixing the date of hearing in this proceeding less than 15 days after publication of this order in the FEDERAL REGISTER.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on July 20, 1953, at 9:30 a.m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street. NW., Washington, D. C., concerning the matters involved and the issues presented by the application herein: Provided, however That the Commission may, after a noncontested hearing dispose of the proceeding pursuant to provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: July 9, 1953. Issued: July 10, 1953. By the Commission.

LEON M. FUQUAY, Secretary.

DEPARTMENT OF COMMERCE

Civil Aeronautics Administration

[Amdt. 24]

OFFICE OF AVIATION SAFETY

In accordance with the public information requirements of the Administrative Procedure Act, the description of the Organization and Functions of the Civil Aeronautics Administration is hereby amended. This amendment delegates to the Chief, General Safety Division, authority to grant permission in specified routine cases for the navigation of aircraft within the airspace reservation established over the District of Columbia.

Section 33, published on August 9, 1952, in 17 F. R. 7304, and amended on November 19, 1952, in 17 F. R. 10574, is 4188

amended by adding a new paragraph (a) (9) to read:

SEC. 33. Office of Aviation Safety.

(a) Functions. * * *

(9) Grants special permission, through the Chief, General Safety Division, for the navigation of aircraft, engaged in aerial photography or surveying, or in safety or rescue missions, within the airspace reservation established by the President over portions of the District of Columbia.

(E. O. 10126, 3 CFR, 1950 Supp., p. 100; Reorg. Plan No. 5 of 1950, 3 CFR, 1950 Supp., p. 165; Dept. of Commerce Order No. 115, 15 F. R.

This amendment shall become effective July 20, 1953.

OFFICE OF DEFENSE **MOBILIZATION**

[Defense Manpower Policy No. 4, Notification 41, Revocation]

PLACEMENT OF PROCUREMENT IN THE MARTINSBURG, W VA., AREA

NOTIFICATION TO DEPARTMENT OF DEFENSE AND GENERAL SERVICES ADMINISTRATION

The Department of Labor has notified. the Surplus Manpower Committee that Martinsburg, West Virginia, is no longer classified as a Group IV surplus labor area, and is now an unclassified area. Therefore, in accordance with the standards established by the Secretary of Labor under section III paragraph 2 of Defense Manpower Policy 4, the certification of this area has been withdrawn.

The Department of Defense and the General Services Administration are hereby notified that preference in the placement of Government contracts, in. accordance with Defense Manpower Policy No. 4, should no longer be given to the above named area. Effective immediately Notification 41 is revoked.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 70-3095, 70-2973]

ELECTRIC ENERGY, INC., ET AL.

ORDER PERMITTING ISSUANCE AND SALE OF BONDS TO FINANCE FACILITIES SERVING AN ATOMIC ENERGY PROJECT

JULY 10. 1953.

In the matter of Electric Energy, Inc., Middle South Utilities, Inc., Union Electric Company of Missouri; File Nos. 70-3095, 70-2973.

Electric Energy, Inc. ("Electric Energy") a public utility company, and the following of its parent companies, Middle South Utilities, Inc. ("Middle South") a registered holding company, and Union Electric Company of Missouri ("Union"), a registered holding company and a public utility company, have filed a joint application-declaration and amendments thereto pursuant to sections 6, 7, and 12 of the act regarding the issuance and sale by Electric Energy of a maximum of \$30,000,000 principal amount of 41/2 percent First Mortgage Sinking Fund Bonds; and the execution of certain related contracts. Electric Energy has requested that said issuance and sale of bonds be exempted from the competitive bidding requirements of Rule U-50 promulgated under the act,

Electric Energy has also requested that the Commission's order of January 30, 1953, entered under File No. 70-2973, be modified to the extent necessary to permit the proceeds from the sale of \$4,000,000 of its 3% percent First Mortgage Sinking Fund Bonds to be utilized as proposed in the instant applicationdeclaration, as amended, and to permit certain proposed changes in various contracts related to all of Electric Energy's

first mortgage bonds.

Said joint application-declaration, as amended, having been duly filed and notice of said filing having been duly given in the form and manner prescribed by Rule U-23 and the Commission not having received a request for hearing with respect to said joint application-declaration, as amended, within the period specified in said notice, or otherwise, and not having ordered a hearing thereon: and

The Commission having considered the record in the matter and having filed this day its Memorandum Opinion herein and finding for the reasons set forth in said Memorandum Opinion that it is appropriate to grant the application and permit the declaration to become effective, and to grant the requested exemption from the competitive bidding requirements of Rule U-50; and to modify its order of January 30, 1953 (File No. 70-2973) to the extent requested;

It is ordered, Pursuant to Rule U-23 that said joint application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective forthwith, and that the proposed issuance and sale of bonds by Electric Energy be, and the same hereby is, exempted from the competitive bidding requirements of Rule U-50, all subject to the terms and conditions prescribed in Rule U-24 and to the following additional terms and conditions:

(a) That this order, our opinion herein, our Memorandum Opinions dated January 15, 1951, (Holding Company Act Release No. 10340) June 26, 1951 (Holding Company Act Release No. 10639) and January 30, 1953 (Holding Company Act Release No. 11658) as well as any contracts or relationships then existing will not be pleaded in any future proceedings under section 10 of the Act, as contemplated in the Commission's aforesaid order of January 15, 1951.

(b) That jurisdiction be reserved over all fees and expenses to be incurred in connection with the proposed transactions.

It is further ordered. That the Commission's order dated January 30, 1953 entered under File No. 70-2973 be, and hereby is, modified to the extent requested herein.

By the Commission.

INVESTIGATION INSTITUTED AND HEARING SET

Institution of investigation. By direction of the President, dated July 9, 1953, the United States Tariff Commission, on the 10th day of July 1953, instituted, and hereby gives notice of an investigation, under section 22 of the Agricultural Adjustment Act, as amended, and Executive Order No. 7233 of November 23, 1935, for the purpose of determining whether wool of the sheep subject to duty under paragraphs 1101 (a) and 1102 of the Tariff Act of 1930, carbonized wool of the sheep subject to duty under paragraph 1106 of the said act, or sheep's wool tops subject to duty under the said paragraph 1106 are being or are

practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective or materially interfere with the price-support program for wool undertaken by the United States Department of Agriculture, or to reduce substantially the amount of products processed in the United States from domestic wool.

Hearing. All parties interested will be given opportunity to be present, to produce evidence, and to be heard at a public hearing to be held in the Tariff Commission Building, 8th and E Streets NW., Washington, D. C., beginning at 10 a.m. on the 31st day of August 1953.

Regulest to appear. Parties desiring to appear at the public hearing should notify the Secretary of the Commission in writing at its offices in Washington, D. C., in advance of the hearing.

The Commission's rules of Rules. practice and procedure set forth in Part 204 the rules governing investigations under section 22. Copies of these rules may be obtained from the United States Tariff Commission, Washington 25, D. C.

I hereby certify that the above investigation was instituted by the United States Tariff Commission on the 10th day of July 1953.

Issued: July 10, 1953.

Donn N. Bent. Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28257]

SUGAR FROM SCALLEY, WASH., TO ILLINOIS, IOWA, MISSOURI AND WISCONSIN

APPLICATION FOR RELIEF

JULY 13, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by W J. Prueter, Agent, for carriers parties to schedule listed below.

Commodities involved: Sugar, beet or cane, carloads.

From: Scalley, Wash. To: Points in Illinois, Iowa, Missourl and Wisconsin.

Grounds for relief: Competition with rail carriers, circuitous routes, market competition, and to maintain grouping.

Schedules filed containing proposed rates: C. J. Hennings, Alternate Agent, tariff I. C. C. No. 1552, supp. 35.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters in-

velved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

GEORGE W LARD, [SEAL] Acting Secretary.
